AGENDA
RIO DELL PLANNING COMMISSION
REGULAR MEETING
THURSDAY, MARCH 27, 2014 – 6:30 P.M.
CITY COUNCIL CHAMBERS
675 WILLOWOOD AVENUE, RIO DELL

WELCOME . . . By your presence in the City Council Chambers, you are participating in the process of representative government. Copies of this agenda, staff reports and other material available to the Planning Commission are available at the City Clerk’s office in City Hall, 675 Wildwood Avenue and on the City’s website at riodellcity.com. Your City government welcomes your interest and hopes you will attend and participate in Rio Dell Planning Commission meetings often.

THE TYPE OF COMMISSION BUSINESS IS IDENTIFIED IMMEDIATELY AFTER EACH TITLE IN BOLD CAPITAL LETTERS.

A. CALL TO ORDER

B. ROLL CALL

C. PLEDGE OF ALLEGIANCE

D. CEREMONIAL

E. CONSENT CALENDAR

1) 2014/0327.01 - Approve Minutes of the January 22, 2014 Regular Meeting (ACTION) 1
2) 2014/0327.02 - Approve Minutes of the February 13, 2014 Study Session (ACTION) 6
3) 2014/0327.03 - Public Hearing/Adopt Resolution No. PC-079-2014 Approving the Double “S” – Wendt Lot Line Adjustment (ACTION) 10
4) 2014/0327.04 - Public Hearing – Adopt Resolution No. PC-081-2014 Approving the Marks Lot Line Adjustment (ACTION) 20

F. PUBLIC PRESENTATIONS

This time is for persons who wish to address the Commission on any matter not on this agenda and over which the Commission has jurisdiction. As such, a dialogue with the Commission or staff is not intended. Items requiring Commission action not listed on this agenda may be placed on the next regular agenda for consideration if the Commission directs, unless a finding is made by at least 2/3rds of the Commission that the item came up after the agenda was posted and is of an urgency nature requiring immediate action. Please limit comments to a maximum of 3 minutes.

G. SCHEDULED MATTERS/PUBLIC HEARINGS/STUDY SESSIONS
1) 2014/0327.05 - Modification of an Approved Conditional Use Permit for the Design Review of a 9,100 sq. ft. Dollar General Store Replacing Smooth Split-Face Concrete Masonry Siding with Nichiha Fiber Cement Siding (ACTION) 31

3) 2014/0327.07 - Public Hearing – Adopt Resolution No. PC-080-2014 Approving a Zoning & General Plan Amendment Establishing a Residential Multi-family (RM) Designation with an Allowable Density of 15 Units Per Acre and Recommending a Portion of N. Rigby Ave. Be Re-designated from Urban Residential (UR) to Residential Multi-family (RM) (ACTION)

4) 2014/0327.08 - Public Hearing – Adopt Resolution No. PC-082-2014 Approving a General Plan Amendment and Zone Reclassification of the City Parking Lot (APN 053-141-021 from Town Center (TC) to Public Facility (PF) (ACTION)

H. CONTINUED STUDY SESSIONS

1) 2014/0226.09 – Continued Review and Discussion of Land Use Matrix and Definitions

I. REPORTS/STAFF COMMUNICATIONS

J. ADJOURNMENT

In compliance with the American with Disabilities Act, if you need special assistance to participate in this meeting, please contact the Office of the City Clerk at (707) 764-3532. Notification 48 hours prior to the meeting will enable the City to make reasonable arrangements to assure accessibility to the meeting.

The next Regular Planning Commission meeting is scheduled for Thursday, April 24, 2014 at 6:30 p.m. in the City Council Chambers

-2-
CALL TO ORDER

The regular meeting of the Rio Dell Planning Commission was called to order at 6:30 p.m. by Commissioner Chapman.

Present were Commissioners Chapman, Angeloff, Long, Millington and Theuriet.

Others present were Community Development Director Caldwell and City Clerk Dunham.

CEREMONIAL

Swearing in and Seating of two (2) Reappointed Members to the Planning Commission; Gary Chapman and Alice Millington for Terms Ending December 31, 2016

City Clerk Dunham administered the Oath of Office to the two reappointed members of Planning Commission; Gary Chapman and Alice Millington for three year terms ending December 31, 2016.

CONSENT CALENDAR

Motion was made by Theuriet/Angeloff to approve the consent calendar including approval of minutes of the December 11, 2013 regular meeting. Motion carried 5-0.

PUBLIC PRESENTATIONS

None

SCHEDULED MATTERS/PUBLIC HEARINGS/STUDY SESSIONS

Public Hearing/Adopt Resolution No. PC-077-2013 Recommending Approval of Text Amendments to the Commercial and Industrial Designations and allowing uses not specifically allowed with a CUP, but are similar to and compatible with the uses permitted in the zone with a CUP, Sections 17.20.040(2), 17.20.050(1)(c), 17.20.050(2), 17.20.060(1), 17.20.060(2), 17.20.100(1), 17.20.100(2), 17.20.110(1) and 17.20.110(2) of the Rio Dell Municipal Code

Community Development Director Caldwell provided a staff report and stated the City is often contacted by individuals interested in certain use types that may not be specifically identified as an allowed use in the zone. He said principally permitted uses under the Neighborhood Commercial zone includes the language “such as” which provides staff some flexibility in considering uses that are not specifically identified as principally permitted uses. As such, staff is recommending the City amend the language to clearly
indicate the identified use type by replacing the language “such as” with “similar to and including but not limited to”.

Commissioner Millington asked if the idea is to move toward being more inclusive with regard to use types.

Community Development Director Caldwell explained the goal is to allow more flexibility to consider uses not specifically identified thus enabling the City to plan for more orderly development.

Commissioner Angeloff commented that he likes the new language as proposed because it basically directs staff to allow more options rather than less; thereby broadening staff’s authority rather than restricting it.

Community Development Director Caldwell noted that there is current language in the zoning regulations that talks about designation of zones and where there are “uncertain zone boundaries” the Planning Commission will make that determination at no cost to the applicant; he said he would also like to see incorporation of the same language for “uncertain use types” because the determination would also fall under the purview of the Planning Commission. He said he will bring back the draft language for consideration at the next meeting.

A public hearing was opened to receive public input on the proposed text amendments. There being no public present, the public hearing closed.

Motion was made by Angeloff/Millington to adopt Resolution No. PC-077-2014 recommending approving the text amendment to the Commercial and Industrial Designations, replacing the language “such as” with “similar to and including but limited to” and to allow uses not specifically allowed with a Conditional Use Permit, but are similar to and compatible with the uses permitted in the zone with a Conditional Use Permit. Motion carried 5-0.

Consider and Recommend Approval to Change the Day in Which Regular Planning Commission Meetings are Held
Community Development Director Caldwell provided a staff report and said at the last meeting, Commissioner Long announced that because of pre-existing obligations and his understanding when he came on the Commission that there would be only one meeting each month, he would like to explore the possibility of changing the meeting day for Planning Commission meetings from Wednesday to possibly Monday or Thursday.
Commissioner Theuriet pointed out that both Thanksgiving Day and Christmas Day fall on the 4th Thursday this year and that she would prefer the meeting be held on the 4th Monday of each month, or perhaps the 2nd or 4th Tuesday.

City Clerk Dunham pointed out that a lot of holidays are observed on Monday.

After further consideration, the Commission concurred to recommend approval to the City Council to change the day of the month in which regular Planning Commission meetings are held from the 4th Wednesday to the 4th Thursday.

Community Development Director Caldwell referred to the current language contained under Section 2.60.030(4) of the RDMC which states in part that the Commission shall hold at least one regular meeting each month and suggested the language be revised to say “the Commission shall hold regular meetings as necessary”. Also, if a conflict arises with regard to a holiday, rather than being bound to hold the meeting on the following day at the same hour that the language be revised to say “a special meeting will be called to compensate for the meeting falling on a holiday”.

Commissioner Angeloff stated that even if there are no scheduled matters to come before the Commission, he would still like to hold the regular monthly meeting for the purpose of having a strategy meeting.

Motion was made by Theuriet/Angeloff to recommend to the City Council a text amendment to Section 2.60.030(4) of the Rio Dell Municipal Code to change the regular meeting day of the Planning Commission from the fourth Wednesday of the month to the fourth Thursday of the month at the same time and place; and in the event that the fourth Thursday falls on a legal holiday, the meeting shall be held the following Thursday at the same hour. Motion carried 4-1; Commission Millington cast the dissenting vote.

CONTINUED STUDY SESSIONS

Continued Review and Discussion of Land Use Matrix and Definitions
Community Development Director Caldwell announced that he would like to schedule one study session each month to continue review and discussion of this item in addition to discussion during regular meetings if time allows.

Commissioners concurred to schedule a study session for February 13, 2014 at 6:30 p.m. for the purpose of continuing review and discussion of the Land Use Matrix and definitions.
The Commission continued with review of the Use Types beginning with *Frame (Art) Shops*, currently only principally permitted in Town Center (TC).

Commissioner Angeloff questioned whether *Frame (Art) Shops* should be precluded in commercial zones with a CUP. Community Development Director Caldwell said his recommendation is that they be principally permitted in CC and NC along with TC. Commissioners concurred.

Moving on to *Fruit & Vegetable Stands*, Community Development Director Caldwell stated he was approached by a resident on Bellevue Ave. who wanted to set up a fruit stand in the Rural (R) zone. He said the use is currently allowed with a CUP but would support the use being principally allowed in the R zone along with TC, CC and NC. He said approval of the business license would be conditioned on the applicant submitting a parking plan.

Commissioner Angeloff suggested consideration be given to principally permit the use in the PF zone to accommodate for farmers markets. Commissioners concurred.

Commissioners concurred to delete the use type *Funeral Homes/Mortuaries* since there is no community cemetery in the City and unlikely there would be the need for a funeral home.

The next use type, *Furniture/Furnishings* was combined with the use type *Appliance and Household Goods Sales and Service – Retail*.

Commissioner Millington asked for consideration to allow *Garden Centers/Plant Nurseries* in the UR zone. After further discussion, Commissioners concurred to principally permit the use in CC, NC, I, and IC; and conditionally permit the use in UR, SR, SM, R and NR.

The use type, *Gift Shops* was deleted to avoid redundancy with *Retail Sales*.

During review of *Grocery Stores/Supermarkets* it was suggested consideration be given to allow the use in the IC zone. Community Development Director Caldwell commented that for the most part, the Industrial Commercial zone consists of the area of Northwestern Ave. and because water and sewer services have not been extended to that area, it may be premature to expand the use type without being able to provide those services.

Consensus of the Commissioners was to conditionally permit *Grocery Stores/Supermarkets* in the IC zone.
Next was review of *Handicraft Manufacture*, currently principally permitted in I and IC and conditionally permitted in CC.

Commissioner Angeloff said he thought the use should be principally permitted, rather than conditionally permitted in the CC zone; Commissioners concurred. He also suggested the words "limited production" be included in the definition of *Handicraft Manufacture*. The Commissioners also concurred to eliminate the use in I and to principally permit the use in TC.

The use *Hardware Stores*, currently principally permitted in TC and NC was revised to be principally permitted in CC, NC and IC; and conditionally permitted in TC.

The last use type discussed was *Health Clubs (Gyms)*, currently only permitted in TC. The Commissioners concurred to principally permit the use in TC, CC, NC and IC.

Discussion continued regarding the difference between *Health Clubs* and *Health Spas* and whether it would be appropriate to combine the uses.

Community Development Director Caldwell stated he would bring back to the meeting on February 13\(^{th}\), definitions for *Handicraft Manufacture/Health Spas*, and *Large Retail*.

**REPORTS/STAFF COMMUNICATIONS**

Community Development Director Caldwell reported that on the next regular meeting agenda he expected to have two lot line adjustment applications; Northwesterners Ave. (Wendt/McWhorter), and 70-80 Monument Rd. (Marks). He commented that the Subdivision Map Act allows for ministerial approval of lot line adjustments however; the former City Manager felt lot line adjustment applications should be reviewed and approved by the Planning Commission.

Commissioner Millington commented that she has worked with a lot of builders who have said they prefer to work in Rio Dell because of the quick approval process.

**ADJOURNMENT**

The meeting adjourned at 7:45 p.m. to the February 13, 2014 Study Session.

---

Gary Chapman, Chair

Karen Dunham, City Clerk
CALL TO ORDER

The Study Session of the Rio Dell Planning Commission was called to order at 6:40 p.m. by Commissioner (Vice-Chair) Angeloff.

Present were Commissioners Angeloff, Long, Millington and Theuriet. Absent was Commissioner Chapman (excused).

Others present were Community Development Director Caldwell and City Clerk Dunham.

PUBLIC PRESENTATIONS

There was no public present for comment.

STUDY SESSION MATTERS

Continued Review and Discussion of Draft Land Use Matrix, Potential New Use Types, Appropriate Zones for New Use Types and Definitions

Community Development Director Caldwell stated at the January 22, 2014 regular meeting, the discussion ended with the use type of Health Spas.

Commissioner Theuriet commented that there needs to be a definition established for spas and that the use type needs to be broken down with a new category for Rehab Therapy Spas which are typically for overnight or weekend use; possibly allowing the use type in the Rural zone. Community Development Director stated that he found a good definition for spas but since he didn’t seem to have it with him suggested moving on with discussion of the next use type and continue with discussion of various spas types at the next meeting.

Continuing on to Hobby Shops. Community Development Director Caldwell stated that a broader definition is needed for this use type but suggested the use be principally permitted in TC, CC, NC; and conditionally permitted in NC. Commissioners concurred.

Commissioner Angeloff questioned whether hobby shops should be conditionally allowed in IC zone. Community Development Director Caldwell pointed out that there are some logistic problems with the Eel River Industrial Park area since there currently are no water or sewer services available. Until such time services become available he would not recommend the use be expanded to that area. Commissioners concurred.
Next was the use type Hospitals in which Community Development Director Caldwell noted that there currently are no zones within the City identified for that use type. He said with the nearest hospital only 7 miles away, the likelihood of a hospital in Roc Dell would be slim.

Commissioner Theuriet commented that one potential use in the future may be a trauma center. Community Development Director Caldwell said that use could fall under the use type of Medical and Dental Offices. Commissioners concurred to add Urgent Care/Hospice Services to Medical Offices.

With regard to Hotels and Motels, Commissioners agreed to conditionally permit the use in TC, CC, and NC; principally permit them in IC since there would be no residential uses bordering that zone.

The use type Hotels and Motels in a Mixed Use Building was expanded to the same zones as Hotels and Motels. Community Development Director Caldwell said the two use types could perhaps be combined.

Commissioner Theuriet questioned whether Hostels should be included in the use type. Community Development Director Caldwell agreed to look for a definition for Hostels.

Community Development Director Caldwell said Kennels and Animal Boarding is currently only principally permitted in I and IC and asked for suggestions on other potential zones.

Commissioner Theuriet suggested they also be permitted in the R zone. Community Development Director Caldwell suggested they be conditionally permitted so setbacks can be established. Commissioners concurred.

It was agreed that Laundromats, currently principally permitted in TC and NC should also be principally permitted in CC.

It was also agreed that Live-Work Units, currently conditionally permitted in TC be principally permitted in TC and conditionally permitted in NC.

Commissioner Theuriet questioned whether any thought was given to allowing Live-Work Units in residential zones. Community Development Director Caldwell commented that with the newly expanded Home Occupation regulations, many businesses are allowed in residential zones.
Discussion continued with *Lodging Uses, Including Lodging Provided as Part of the Civic or Cultural Use*. Commissioner Angeloff commented that he would like further definition of the use type. Commissioners agreed to conditionally permit the use in UR SR, SM, R and NR; and principally permit the use in PF.

It was pointed out that the matrix referred to the SM (Suburban Medium) zone however; it should be identified as SL (Suburban Low) as there is no current land use designation for SM.

Discussion continued regarding *Lumber Yards* and whether they should be combined with *Building Material Stores*. It was determined that the use type *Lumber Yards* be established with two separate categories; *wholesale lumber yards and retail lumber yards*, and that a definition be created to each of the use types. The use was principally permitted in I and IC.

Continuing on to *Management for Fish and Wildlife Habitat*, it was suggested the use be expanded to include *Wildlife Care Centers*. After further discussion, commissioners concurred to strike the use entirely until such time an applicant expresses interest. It was pointed out that this type of use could probably be allowed under *Animal Kennels* anyway.

Community Development Director Caldwell noted that there are three types of *Manufacturing* identified on the matrix with no definition for any of them. After discussion, it was decided that *Manufacturing* be deleted and *Manufacturing – Heavy* be principally permitted in I and IC; *Manufacturing – Light* be principally permitted in CC, I, and IC; conditionally permitted in TC and NC.

Community Development Director Caldwell noted that *Massage Establishments* could fall under the use type of *Health Spa* but suggested the use remain separate for now. Consensus was that the use be principally permitted in TC, CC and NC and conditionally permitted in IC.

There was considerable discussion regarding *Metal Working Shops* and the definition of *Light Manufacturing* versus *Heavy Manufacturing*.

Commissioner Theuriel pointed out that *Metal Working Shops* could be permitted under *Artisan Shops* in the TC; whereas *Metal Working Shops* could be classified as either *Light or Heavy Manufacturing*.

Consensus was to strike *Metal Working Shops*. 

REPORTS/STAFF COMMUNICATIONS

Community Development Director Caldwell stated further review and discussion of the Land Use Matrix would continue with *Mortuaries and Funeral Homes* at the next meeting scheduled for February 26, 2014 beginning at 5:30 p.m. He said he will be bringing back to the Commission the use type definitions as discussed, and also hoped to have a text amendment establishing Density Bonus regulations and a Zoning and General Plan Amendment establishing a Residential Multifamily (RM) designation with a density of 15 units per acre related to parcels along Rigby Ave. and Center St., currently zoned Urban Residential (UR).

ADJOURNMENT

The meeting adjourned at 8:25 p.m. to the February 26, 2014 Regular Meeting.

________________________
Gary Chapman, Chair

________________________
Karen Dunham, City Clerk
To: Planning Commission

From: Kevin Caldwell, Community Development Director

Through: Jim Stretck, City Manager

Date: February 20, 2014

Subject: Double "S" - Wendt Lot Line Adjustment and Merger; Eel River Industrial Park APN No's. 205-111-020, 040, 041 & 043; Case No's. LLA 14-01; NOM 14-01

Recommendation:

That the Planning Commission:

1. Receive staff's report regarding the proposed lot line adjustment and merger;

2. Open the public hearing, receive public input, close the public hearing and deliberate;

3. Find that the proposed lot line adjustment and merger is consistent with the Rio Dell General Plan, Zoning and Building regulations and is Categorically Exempt pursuant to Section 15305 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations

4. Adopt Resolution No. PC 079-2014 approving the proposed lot line adjustment and merger.

Summary

The applicant is proposing a lot line adjustment between four vacant parcels and the merger of a Caltrans "give-back" parcel to the adjacent four parcels. The parcels are located at the Eel River Industrial Park. The proposed lot line adjustment and merger will result in four parcels of 3.04, 1.01, 1.01 and 2.56 acres.
Based on the proposed project, staff has determined that the project is Statutorily Exempt pursuant to Class 5, Section 15305 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations. This exemption applies to lot line adjustments with an average slope of less than 20% and does not result in any changes in land use or density.

The applicant has submitted evidence in support of making the required findings. Lot line adjustments shall be approved if the required findings can be made. Therefore staff recommends that the Planning Commission approve the project as conditioned.

Required Findings

A lot line adjustment shall be approved or conditionally approved when there is compliance with all of the following approval criteria:

1) The application is found to be complete; and

2) Either (a) the parcels to be adjusted are found to be in compliance with the Subdivision Map Act and local subdivision regulations, or (b) a Conditional Certificate of Subdivision Compliance for the parcel or parcels has been issued for recordation prior to or concurrent with the lot line adjustment; and

3) The proposed lot line adjustment neither causes non-conformance nor increases the severity of pre-existing nonconformities with the General Plan, Zoning and Building ordinances. Providing compliance with this subsection, the approval shall not be conditioned on correction or preexisting non-conformities with the General Plan, Zoning and Building ordinances.

Staff Analysis

1. Complete Application

The applicant has submitted the required application materials including the map/plot plan illustrating the proposed lot line adjustment, copies of the current deeds, creation documents and copies of a Preliminary Title Report (PTR) for each of the parcels.

2. Subdivision Map Act Compliance

of Official Records. The parcel (APN 205-111-020) was then conveyed in 1955, Document No. 10357, Book 346, Page 559 of Official Records. The Caltrans give back parcel, a long, narrow sliver adjacent to Highway 101 was created when Highway 101 was built/expanded in the 1960's. The parcel at its widest point is approximately 35 feet. Caltrans conveyed the unused portion of the original parcel back to Eel River Sawmills in 1990, Document No. 1990-15324-4 of Official Records. Pursuant to Section 66428 of the Government Code (Map Act) conveyances to and from governmental agencies is exempt from the Map Act.

Although five parcels are included in the application, the Caltrans parcel will actually be merged with the adjacent parcels, resulting in four parcels. As such, the proposed lot line adjustment is consistent with the Map Act and local regulations.

3. General Plan, Zoning and Building Ordinance Consistency

The parcels are planned and zoned Industrial Commercial (IC). The purpose of the Industrial Commercial zone is to provide for industrial and commercial uses. A copy of the Industrial Commercial development standards is included as Attachment 1. The Industrial Commercial designation requires a minimum parcel size of 20,000 square feet. The resulting parcels will be 3.04, 1.01, 1.01 and 2.56 acres respectively, meeting the minimum parcel size requirement.

Again, the parcels are vacant and any future development must meet the City's development standards, including setbacks, lot coverage, building height and the provision of water and sewer facilities. Currently there are no public services available to the parcels. Prior to the issuance of any Building Permits, the owners will be required to demonstrate site suitability (i.e. septic and water). Approval of the Lot line Adjustment does not guarantee that the parcels are suitable for development in accordance with existing and future regulations.

Based on comments from referral agencies, information submitted by the applicant and the recommended conditions of approval, the evidence supports the finding that the proposed lot line adjustment is in conformance with all applicable policies of the Zoning Regulations, General Plan and Building Regulations.

4. California Environmental Quality Act (CEQA)

Based on the proposed project, staff has determined that the project is Statutorily Exempt pursuant to Class 5, Section 15305 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations. This exemption applies to lot lines adjustment with an average slope of less than 20% and does not result in any changes in land use or density.

Attachment 3: Resolution No. PC-079-2014
Double "S" Investments & Wendt Construction Lot Line Adjustment

APN's 205-111-20, 41 & 43 (Double "S" Investments) & APN 205-111-040 (Wendt Construction)
17.20.110 Industrial Commercial or IC zone.

The purpose of the industrial commercial zone is to provide for industrial and commercial uses.

(1) Principal Permitted Uses.

(a) Industrial uses as described in the industrial land use designation and compatible commercial uses described in the community commercial land use designation;

(b) Public facility needs such as a wastewater treatment plant;

(c) Motor vehicle repair, maintenance and fueling; and

(d) Telecommunications facilities and manufacturing.

(2) Uses Permitted with a Use Permit.

(a) Lodging; and

(b) Child care.

(3) Other Regulations. See Table 17.20.110 for development standards for the IC zone.

Double "S" – Wendt Lot Line Adjustment and Merger
APN No’s. 205-111-020, 040, 041 & 043;; Case No’s. LLA 14-01; NOM 14-01

Conditions of Approval

Approval of the Lot Line Adjustment is conditioned upon the following terms and requirements:

1. The instruments of record as approved by the Planning Department shall be recorded and the lot line adjustment shall be completed within thirty-six (36) months of approval of the lot line adjustment.

Prior to expiration, the applicant or property owner may request extension of the filing deadline by submitting a written extension request and a filing fee as set by resolution of the City Council.

The Planning Director may grant a maximum of three years extension of the filing deadline if the Planning Director finds that the conditions under which the tentative approval was issued have not significantly changed.

2. A Notice of Lot Line Adjustment shall be recorded for the resulting parcels. The following information must be submitted to the Planning Department for review prior to recordation:

   (a) A copy of the deeds to be recorded for the adjusted parcels; provided however, that when the parcels being adjusted are held in common ownership, no new deeds shall be required for the preparation of the Notice of Lot Line Adjustment.

   (b) A Lot Book Guarantee or Preliminary Title Report current within 6 months or other evidence satisfactory to the Planning Department regarding ownership of parcels.

   (c) Completed "Notice of Lot Line Adjustment and Certificate of Subdivision Compliance" forms (these are available from the Planning Department).

3. When the parcels being adjusted are not held in common ownership, copies of the executed deeds (signed but not recorded) must be submitted for review and approval to the Planning Department.

4. Pursuant to Section 8762 of the Business and Professions Code a Record of Survey monumenting the corners of the new property line(s) may be required. The City Engineer shall not require the Record of Survey if in his opinion any one of the following findings can be made:

   (a) The new boundary line(s) are already adequately monumented of record.
(b) The new boundary line(s) can be accurately described from Government Subdivision Sections or aliquot parts thereof.

(c) The new boundary line(s) can be accurately described and located from existing monuments of record.

(d) The new boundary is based upon physical features (i.e. roads, creeks, etc.) which themselves monument the line.

5. The applicants shall provide documentation form the County of Humboldt Tax Collector that all property taxes for the parcels involved in the lot line adjustment have been paid in full if payable, or secured if not payable to the satisfaction of the County Tax Collector’s Office, and all special assessments on the parcels must be paid or reapportioned to the satisfaction of the affected assessment district. Please contact the Tax Collector’s Office approximately three to four weeks prior to submitting the required conditions of approval.

Informational Note:

1. Approval of the Lot line Adjustment does not guarantee that the parcels are suitable for development in accordance with existing and future regulations.

2. The owner’s of APN’s 205-111-041 (Double “S” Investment) and 205-111-040 (Wendt Construction) are responsible to maintain the on-site drainage ditches and culverts.
RESOLUTION NO. PC 079 – 2014

RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF RIO DELL
APPROVING THE DOUBLE “S” – WENDT LOT LINE ADJUSTMENT

WHEREAS the applicant is proposing a lot line adjustment between four vacant parcels and the merger of a Caltrans “give-back” parcel to the adjacent four parcels; and

WHEREAS the parcels are located at the Eel River Industrial Park; and

WHEREAS the proposed lot line adjustment and merger will result in four parcels of 3.04, 1.01, 1.01 and 2.56 acres

WHEREAS the applicant has submitted evidence in support of making the required findings and

WHEREAS the City has reviewed the submitted application and evidence and has referred the project to various agencies for review, comments and recommendations; and

WHEREAS the reviewing agencies have recommended approval or conditional approval; and

WHEREAS staff has determined that the project is Statutorily Exempt pursuant to Section 15305 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations; and

WHEREAS pursuant to Section 15305 of the CEQA Guidelines this exemption applies to lot line adjustments with an average slope of less than 20% and does not result in any changes in land use or density.

NOW, THEREFORE, BE IT RESOLVED the City finds that based on evidence on file and presented in the staff report that the proposed lot line adjustment complies with all of the following required findings:

1. That the proposed lot line adjustment is consistent with the City’s General Plan; and
2. That the proposed lot line adjustment complies with the requirements and standards of the City’s zoning regulations; and

3. That the proposed lot line adjustment complies with the requirements and standards of the City’s Building Regulations; and

4. That the proposed lot line adjustment Statutorily Exempt pursuant to Section 15305 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations.

BE IT FURTHER RESOLVED that the Planning Commission of the City of Rio Dell approves the project subject to the recommended conditions of approval.

APPROVED AND ADOPTED by the Planning Commission of the City of Rio Dell at their meeting of March 27, 2014 by the following vote:

I HEREBY CERTIFY that the forgoing Resolution was PASSED and ADOPTED at a regular meeting of the Planning Commission of the City of Rio Dell on March 27, 2014 by the following vote:

ATTEST:

I, Karen Dunham, City Clerk for the City of Rio Dell, State of California, hereby certify the above and foregoing to be a full, true and correct copy of Resolution No. PC 079-2014 adopted by the Planning Commission of the City of Rio Dell on February 26, 2014.

______________________________
Karen Dunham, City Clerk, City of Rio Dell
For Meeting of: March 27, 2014

To: Planning Commission

From: Kevin Caldwell, Community Development Director

Through: Jim Stretch, City Manager

Date: March 18, 2014

Subject: An application for a Lot Line Adjustment between 2 parcels of about 5,000 square feet and about 35,000 square feet. The lot line adjustment will adjust about 19,000 square feet from APN 053-141-044 to APN 053-141-029, resulting in two parcels of about 24,000 square feet and 16,000 square feet. Case No. LLA 14-02

Recommendation:

That the Planning Commission:

1. Receive staff's report regarding the proposed lot line adjustment;

2. Open the public hearing, receive public input, close the public hearing and deliberate;

3. Find that the proposed lot line adjustment is consistent with the Rio Dell General Plan, Zoning and Building regulations and is Categorically Exempt pursuant to Section 15305 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations

4. Adopt Resolution No. PC 081-2014 approving the proposed lot line adjustment.

Summary

A lot line adjustment between 2 parcels of about 5,000 square feet and about 35,000 square feet. The lot line adjustment will adjust about 19,000 square feet from APN 053-141-044 to APN 053-141-029, resulting in two parcels of about 24,000 square feet and 16,000 square feet.
Based on the proposed project, staff has determined that the project is Statutorily Exempt pursuant to Class 5, Section 15305 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations. This exemption applies to lot line adjustments with an average slope of less than 20% and does not result in any changes in land use or density.

The applicant has submitted evidence in support of making the required findings. Lot line adjustments shall be approved if the required findings can be made. Therefore staff recommends that the Planning Commission approve the project as conditioned.

Required Findings

A lot line adjustment shall be approved or conditionally approved when there is compliance with all of the following approval criteria:

(1) The application is found to be complete; and

(2) Either (a) the parcels to be adjusted are found to be in compliance with the Subdivision Map Act and local subdivision regulations, or (b) a Conditional Certificate of Subdivision Compliance for the parcel or parcels has been issued for recordation prior to or concurrent with the lot line adjustment; and

(3) The proposed lot line adjustment neither causes non-conformance nor increases the severity of pre-existing nonconformities with the General Plan, Zoning and Building ordinances. Providing compliance with this subsection, the approval shall not be conditioned on correction or preexisting non-conformities with the General Plan, Zoning and Building ordinances.

Staff Analysis

1. Complete Application

The applicant has submitted the required application materials including the map/plot plan illustrating the proposed lot line adjustment, copies of the current deeds, creation documents and copies of a Preliminary Title Report (PTR) for each of the parcels.

2. Subdivision Map Act Compliance

The parcels were created in compliance with State and local regulations. Assessor parcel 053-141-029 was created by deed on March 30, 1948, Zermia Scatina to Wildwood Fire Protection District, recorded in Book 52, Page 466 of Official Records. Assessor parcel 053-141-044 was created by Parcel Map, Parcel 2 of Parcel Map 1768 of Parcel Maps, recorded in Book 15, Page 101 in the Office of the County Recorder.
3. General Plan, Zoning and Building Ordinance Consistency

The parcels are planned and zoned Urban Residential (UR). The purpose of the Urban Residential zone is to provide neighborhood residential areas with varying densities for single family dwellings. A copy of the Urban Residential development standards is included as Attachment 2. The Urban Residential designation requires a minimum parcel size of 6,000 square feet. The resulting parcels will be about 24,000 square feet and 16,000 square feet respectively, meeting the minimum parcel size requirement.

The proposed lot line adjustment does not result in any nonconformity in regards to setbacks or lot coverage. Currently the water meter for APN 053-141-044 is actually on APN 053-141-029. The applicants will need to create an easement across APN 053-141-029 for the benefit of APN 053-141-044. The project has been conditioned accordingly.

Based on comments from referral agencies, information submitted by the applicant and the recommended conditions of approval, the evidence supports the finding that the proposed lot line adjustment is in conformance with all applicable policies of the Zoning Regulations, General Plan and Building Regulations.

4. California Environmental Quality Act (CEQA)

Based on the proposed project, staff has determined that the project is Statutorily Exempt pursuant to Class 5, Section 15305 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations. This exemption applies to lot lines adjustment with an average slope of less than 20% and does not result in any changes in land use or density.

Attachment 1: Maps
Attachment 2: Urban Residential Development Standards
Attachment 3: Conditions of Approval
Attachment 4: Resolution No. PC -081-2014
17.20.030 Urban Residential or UR zone.

The purpose of the urban residential or UR zone is to provide neighborhood residential areas with varying densities for single-family dwellings. The following regulations shall apply in all urban residential or UR zones:

(1) Principal Permitted Uses.

(a) Detached single-family dwellings.

(2) Uses Permitted with a Use Permit.

(a) Attached dwellings with a minimum lot size of 4,000 square feet;

(b) Rooming and boarding of not more than two persons not employed on the premises;

(c) Public and private non-commercial recreation facilities;

(d) Schools, churches, civic and cultural uses including City offices and day care centers.

(3) Other Regulations. See Table 17.20.030 for development standards for the urban residential (UR) zone.

Marks Lot Line Adjustment
APN No's. 053-141-029 & 053-141-044; Case No. LLA 14-02

Conditions of Approval

Approval of the Lot Line Adjustment is conditioned upon the following terms and requirements:

1. The instruments of record as approved by the Planning Department shall be recorded and the lot line adjustment shall be completed within thirty-six (36) months of approval of the lot line adjustment.

Prior to expiration, the applicant or property owner may request extension of the filing deadline by submitting a written extension request and a filing fee as set by resolution of the City Council.

The Planning Director may grant a maximum of three years extension of the filing deadline if the Planning Director finds that the conditions under which the tentative approval was issued have not significantly changed.

2. A Notice of Lot Line Adjustment shall be recorded for the resulting parcels. The following information must be submitted to the Planning Department for review prior to recordation:

   (a) A copy of the deeds to be recorded for the adjusted parcels; provided however, that when the parcels being adjusted are held in common ownership, no new deeds shall be required for the preparation of the Notice of Lot Line Adjustment.

   (b) A Lot Book Guarantee or Preliminary Title Report current within 6 months or other evidence satisfactory to the Planning Department regarding ownership of parcels.

   (c) Completed "Notice of Lot Line Adjustment and Certificate of Subdivision Compliance" forms (these are available from the Planning Department).

3. When the parcels being adjusted are not held in common ownership, copies of the executed deeds (signed but not recorded) must be submitted for review and approval to the Planning Department.

4. Pursuant to Section 8762 of the Business and Professions Code a Record of Survey monumenting the corners of the new property line(s) may be required. The City Engineer shall not require the Record of Survey if in his opinion any one of the following findings can be made:

   (a) The new boundary line(s) are already adequately monumented of record.
(b) The new boundary line(s) can be accurately described from Government Subdivision Sections or aliquot parts thereof.

(c) The new boundary line(s) can be accurately described and located from existing monuments of record.

(d) The new boundary is based upon physical features (i.e. roads, creeks, etc.) which themselves monument the line.

5. The applicants shall provide documentation form the County of Humboldt Tax Collector that all property taxes for the parcels involved in the lot line adjustment have been paid in full if payable, or secured if not payable to the satisfaction of the County Tax Collector's Office, and all special assessments on the parcels must be paid or reapportioned to the satisfaction of the affected assessment district. Please contact the Tax Collector's Office approximately three to four weeks prior to submitting the required conditions of approval.

6. The applicants shall either (1) grant a utility (water) easement across the southeast corner of APN 053-141-029 in favor of APN 053-141-044; or (2) relocate the water meter and transmission line from APN 053-141-029 to APN 053-141-044. The width of the easement shall be approved by the Department of Public Works.

7. The applicant shall pay the application processing fees within 30 days of billing.

Informational Note:

1. Approval of the Lot line Adjustment does not guarantee that the parcels are suitable for development in accordance with existing and future regulations.
RESOLUTION NO. PC 081 – 2014

RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF RIO DELL
APPROVING THE MARKS LOT LINE ADJUSTMENT

WHEREAS the applicant is proposing a lot line adjustment between 2 parcels of about 5,000 square feet and about 35,000 square feet; and

WHEREAS The lot line adjustment will adjust about 19,000 square feet from APN 053-141-044 to APN 053-141-029, resulting in two parcels of about 24,000 square feet and 16,000 square feet; and

WHEREAS the applicant has submitted evidence in support of making the required findings and

WHEREAS the City has reviewed the submitted application and evidence and has referred the project to various agencies for review, comments and recommendations; and

WHEREAS the reviewing agencies have recommended approval or conditional approval; and

WHEREAS staff has determined that the project is Statutorily Exempt pursuant to Section 15305 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations; and

WHEREAS pursuant to Section 15305 of the CEQA Guidelines this exemption applies to lot line adjustments with an average slope of less than 20% and does not result in any changes in land use or density.

NOW, THEREFORE, BE IT RESOLVED the City finds that based on evidence on file and presented in the staff report that the proposed lot line adjustment complies with all of the following required findings:

1. That the proposed lot line adjustment is consistent with the City’s General Plan; and

2. That the proposed lot line adjustment complies with the requirements and

Marks Lot Line Adjustment March 2014

ATTACHMENT 4
standards of the City's zoning regulations; and

3. That the proposed lot line adjustment complies with the requirements and standards of the City's Building Regulations; and

4. That the proposed lot line adjustment Statutorily Exempt pursuant to Section 15305 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations.

BE IT FURTHER RESOLVED that the Planning Commission of the City of Rio Dell approves the project subject to the recommended conditions of approval.

APPROVED AND ADOPTED by the Planning Commission of the City of Rio Dell at their meeting of March 27, 2014 by the following vote:

I HEREBY CERTIFY that the forgoing Resolution was PASSED and ADOPTED at a regular meeting of the Planning Commission of the City of Rio Dell on March 27, 2014 by the following vote:

Subject: Modification of the Dollar General Design Review Conditional Use Permit
File No. 053-151-001; Case No. DR-CUP 13-01M

Recommendation:

That the Planning Commission:

1. Receive staff's report regarding the proposed Conditional Use Permit;

2. Open the public hearing, receive public input, close the public hearing and deliberate;

3. Assuming that public testimony is substantially in support of the modification, find that:

Zoning Consistency

- The proposed project is consistent with the applicable Zoning regulations and complies with the applicable "Guiding Principles and Design Concepts" in Section 17.250.050(5) Rio Dell Municipal Code (RDMC); and

- The proposed architecture, site design, and landscape are suitable for the purposes of the building and the site and will enhance the character of the neighborhood and community; and

- The architecture, including the character, scale and quality of the design, relationship with the site and other buildings, building materials, screening of exterior
appurtenances, exterior lighting and signing and similar elements establishes a clear
design concept and is compatible with the character of existing or anticipated buildings
on adjoining and nearby properties; and

- The proposed project will not create conflicts with vehicular, bicycle, or pedestrian
transportation modes of circulation; and

**General Plan Consistency**

- The proposed project is consistent with the General Plan

**California Environmental Quality Act**

- The Design Review Conditional Use Permit has been processed in accordance with
the applicable provisions of the California Government Code and the California
Environmental Quality Act (CEQA);

4. Adopt Resolution No. PC 082-2014 approving the modification of the Design Review
Conditional Use Permit subject to the originally adopted Conditions of Approval and
continuing the use and pattern of the Nichiha products on the back wall.

**Background/Summary**

At your meeting of September 25, 2013 your Commission approved the required Design Review
Conditional Use Permit for the 9,100 square foot Dollar General store located at the
intersection of Wildwood Avenue and Davis Street on property known as 44 Davis Street.

The Building Permit was recently issued and preliminary site work has begun. However, it was
quickly determined that ground water levels were higher than expected. Soil borings were
conducted on May 29, 2013. At that time ground water levels were between ten (10) and
fourteen (14) feet. Last month when site work commenced it was discovered that ground
water levels were closer to four (4) feet.

The approved original design utilized smooth and split-faced concrete masonry units (CMU’s)
walls to create texture and relief. The back wall of the building was allowed to be metal siding.
The use of fully-grouted, reinforced CMU’s due to the soil conditions will require massive,
extremely expensive footings and a waffle slab foundation. The total weight of the fully-
grouted reinforced CMU’s for the building is 365,757.5 pounds. According to the Geotechnical
Engineers, the weight of the CMU’s and the foundation system will result in significant
settlement within the first year. This anticipated settlement will result in an unacceptable gap
between the building and the adjacent site work, causing accessibility to the building to be non-
compliant.

Because of the soil conditions and the weight of the CMU walls, the applicant is requesting that
they be allowed to modify the building design by utilizing Nichiha fiber-cement panels in place
of the CMU walls. The CMU walls are approximately 14 times heavier than the Nichiha fiber-cement panels. The applicant is requesting to use a combination of Nichiha's SandStone II (two colors) and Architectural Block to maintain the appearance of the split face and precision block exterior previously approved. Attachment 1 includes proposed building elevations. Also included in your packet is a brochure from the Nichiha Company identifying their various products, including the SandStone II (two colors) and Architectural Block.

Although staff would prefer the use of the originally approved CMU walls, staff understands the constraints of the building site. As such staff is recommending that the Planning Commission approve the applicants' request subject to continuing the use and pattern of the Nichiha products on the back wall. Staff has discussed this recommendation with the applicant and they are agreeable. The project has been condition accordingly.

It should be noted that staff did administratively approve the applicant's request to substitute a six (6) foot board on board fence enclosure around the mechanical equipment located at the back of the building in place of the originally approved concrete block wall. The reason that staff approved the applicant's request as that it was brought to staff's attention that the wood fence would actually attenuate noise better than the concrete block wall enclosure. Staff felt that this was an insignificant change not requiring a modification application to the Planning Commission. However, if the Commission desires, you may condition the project to require the originally approved concrete block wall.

At the time the original approval was granted, a six (6) foot board fence existed along the north property line. For some reason, the previous owner prior conveying the property to the current owner removed a portion of the fence. Staff is recommending that the entire fence be replaced to match the required fence along the east side of the parcel. The project has been condition accordingly.

AS mentioned above, there are no proposed changes to the site plan. Therefore, the original analysis and required findings remain unchanged.

Required Findings/Staff Analysis

1. Zoning Consistency

(a) The proposed use is allowed within the applicable zoning district and complies with all other applicable provisions of this title and all other City ordinances;

Land Use: The property is zoned Community Commercial (CC). Retail uses are principally permitted uses in the Community Commercial zone.

Parking: Section 17.30.180 of the Rio Dell Municipal Code (RDMC) identifies Parking and Loading requirements, including the required number of spaces, landscaping, lighting, surface

\[\text{33}^\text{' Dollar General Design Review PC Modification March 24, 2014}^\text{'}\]
requirements, striping, wheel stops, number of spaces, handicap spaces, bicycle and motorcycle parking and loading spaces.

Based on the size of the proposed building, 9,100 square feet, Section 17.30.180(17)(a) of the RDMC requires one parking space for every 250 square feet of gross floor area. Based on the size of the proposed building, the applicant is required to provide 36.4 parking spaces. The site identifies 37 parking spaces.

Based on the City’s handicap parking requirements, 2 of the required 37 spaces must be handicap accessible, permanently signed and the spaces painted with the international symbol of accessibility. The submitted site plan identifies the required handicap parking spaces.

The applicant is also required to provide bicycle and motorcycle parking. Section 17.30.180(19) of the RDMC identifies the bicycle parking requirements. The number of required bicycle spaces required is based on the number of required parking spaces. As such, the applicant is required to provide 5 bicycle parking spaces or racks. Although the site plan identifies an area for bicycle parking, it does not identify the number of spaces or racks. Staff has conditioned the project to require 5 bicycle parking spaces or racks. Please see Exhibit A. Based on the City motorcycle parking requirements, the applicant is required to provide 2 parking spaces with a minimum dimension of 4 feet wide by 7 feet long. The submitted site plan identifies the required motorcycle parking spaces.

Section 17.30.180(7)(a) of the RDMC requires all parking spaces, access drives and maneuvering areas to be improved with and permanently maintained with an all weather durable asphalt, concrete of comparable surface as required by the Director of Public Works. The submitted site plan indicates that the access drive and maneuvering area will be improved with heavy duty pavement and the parking areas with typical asphalt. Staff has included as an operational condition that the paving be permanently maintained in good condition. Please see Exhibit A. Section 17.30.180(8) of the RDMC requires that the parking spaces be clearly delineated with white 4 inch wide lines and that the striping be continuously maintained in a clear and visible manner. The project has been conditioned accordingly. Please refer to Exhibit A.

Section 17.30.180(9) of the RDMC requires concrete curbing at least 6 inches in height and 6 inches wide around the perimeter of the parking and landscaped areas. The submitted site indicates compliance with this provision. Curbs are allowed as wheel stops, provided that when adjacent to walkways, a minimum walkway width of 4 feet remains for safe and convenient pedestrian use. The proposed walkway in the front of the store is 9 feet wide. Assuming a two foot vehicle overhang, the walkway meets the 4 foot minimum unobstructed width.

Sections 17.30.180(12), (13) and (14) of the RDMC identifies parking area landscape requirements. Landscaping has to be provided throughout the parking lot as a combination of ground cover, shrubs and trees. The landscaping plan does incorporate the use of ground cover including sod, shrubs and trees.
Section 17.30.180(12)(a)(iii) of the RDMC encourages on-site stormwater detention/retention, pollutant cleansing and groundwater recharge. In addition, it is a City policy that there is no net increase in stormwater runoff during a 25 year storm event as a result of a project. The submitted drainage information and design, including a detention/retention basin, is based on a 10 year event and does result in a slight increase in stormwater runoff. Staff has discussed the 25 year event and no net increase criteria, including the use of bio-swales (grassy-swales) with the applicant and agent and they will amend the drainage/ hydraulics plan accordingly. Bio-swales are used to reduce sediment and pollutants form stormwater runoff. The incorporation of detention/retention facilities and bio swales is consistent with the City’s Open Space and Conservation Element, Policies CO 5.2-7 and CO 5.6-2. The project has been conditioned accordingly. Please refer to Exhibit A.

Section 17.30.180(13) of the RDMC requires that parking areas be screened from streets and adjoining properties and contains the following perimeter parking landscaping requirements:

(i) A proposed parking area adjacent to a public street shall be designed with a landscaped planting strip between the street right-of-way and parking area with a minimum depth of 6 feet.

The proposed landscaping plan does provide the required 6 foot minimum width along both Wildwood Avenue and Davis Street.

(ii) Landscaping within the planting strip shall be designed and maintained to screen cars from view from the street to a minimum height of 18 inches, but shall not exceed any applicable height limit for landscaping within a setback.

The landscaping plan does propose the use of “rock rose” at the driveway entrance and at the west end of the parking area. The applicant will be required to provide additional landscaping, possibly “rock rose” along both Wildwood Avenue and Davis Street in order to comply with this provision. The project has been conditioned accordingly. Please see Exhibit A.

(iii) Screening materials may include a combination of plant materials, earth berms, solid decorative masonry walls, raised planters, or other screening devices that are determined by the review authority to meet the intent of this requirement.

The applicant is proposing shrubs and trees to provide the required screening. As indicated above, the applicant will be required to provide additional plantings along Wildwood Avenue and Davis Street to help screen the view of cars in the parking lot from the streets.

(iv) Trees that reach a mature height of at least 20 feet shall be provided within the planting strip in addition to trees within the parking lot interior required by Subsection (a)(v). Trees types shall have root systems that will not extend beyond the planting area.

The applicant is proposing 7 strawberry trees along the perimeter of the parcel. Strawberry trees reach a height of about 40 feet and are about 30 feet across at maturity. The proposed trees on the east side of the parcel appear to be located on top of the existing sewer lateral and close to the existing storm drain. Staff will request verification from the Landscape Architect.
that the root system of the proposed strawberry tress do not extend beyond the boundaries of the planting area and that they will not affect the sewer and storm drain laterals. The project has been conditioned accordingly. Please see Exhibit A.

(v) Plant materials, signs, or structures within a traffic safety sight area of a driveway shall comply with Section 17.30.090(1) (Corner Lots – Sight Distance).

The proposed landscaping plan, including the proposed pylon sign location, appears to be consistent with the City’s visibility regulations. However, staff has conditioned the project to ensure that the required sight distances are maintained. Please see Exhibit A.

Section 17.30.180(14) of the RDMC requires that 10% of the gross area of the parking lot be landscaped. The parking lot is approximately 16,000 square feet. Accordingly, 1,600 square feet of landscaping within or adjacent to the parking area is required. The amount of proposed landscaping easily exceeds the required 1,600 feet. In addition pursuant to Section 17.30.180(14)(a) of the RDMC, trees that reach a minimum height of twenty (20) feet are required within or adjacent to the parking lot at a minimum ration of one (1) tree for every five (5) parking spaces. As indicated above, the applicant is proposing 7 strawberry trees along the perimeter of the parcel, including 5 trees adjacent to the parking area. In order to meet the intent of the applicable provision, staff has conditioned the project to require 2 additional trees adjacent to the parking area. The project has been conditioned accordingly. Please see Exhibit A.

Outdoor lighting fixtures are limited to a maximum height of fifteen (15) feet and the fixtures must be directed downward and away from adjoin properties and public rights-of-way, so that no on-site lighting directly illuminates adjacent properties. The applicant is proposing 3 free standing light fixtures 15 feet in height around the perimeter of the parking lot and 11 light fixtures attached to the building. The lighting/photometric plan indicates that the proposed lighting will not directly illuminate adjacent properties.

Section 17.30.180(21) of the RDMC identifies the number of required loading spaces. Commercial and office uses are required to provide 1 loading space for 15,000 to 100,000 square feet of gross floor area. The gross area of the proposed building is 9,100 square feet. Therefore a loading space is not required. However, the applicant is proposing a loading entrance to the building on the east side of the building.

Design Review: Section 17.25.050 et. seq. for the RDMC contains the Design Review Regulations. The Design Review Regulations apply to new buildings and/or structures. The Planning Commission is required to review and approve, conditionally approve, or deny Design Review applications using the guiding principles and design concepts, application review process, and findings identified in Section 17.25.050(8) of the RDMC. Below are the Guiding Principles and Design Concepts:

- To encourage high quality land/site planning, architecture and landscape design;
To ensure physical, visual, and functional compatibility between uses: and

To ensure proper attention is paid to site and architectural design, thereby protecting land values.

As indicated above the project is also subject to the required Design Review findings found in Section 17.25.050(8) of the RDMC. The required findings are as follows:

(1) The proposed project is consistent with the objectives of the General Plan, complies with applicable Zoning regulations, Specific Plan provisions, Special Planning Area provisions, and is consistent with the applicable "Guiding Principles" and "Design Concepts" in Section 17.250.050(5) Rio Dell Municipal Code (RDMC).

Staff will address General Plan consistency in Section 2 of this staff report. This section of the staff report is addressing the zoning consistency finding, including land use, parking, landscaping and design review.

(2) The proposed architecture, site design, and landscape are suitable for the purposes of the building and the site and will enhance the character of the neighborhood and community.

Based on the submitted plans, staff believes that the design of the building and associated landscaping does enhance the character of the neighborhood and community. However, staff has requested the applicant to add another contrasting band near the top of the building to break-up the upper half of the building. The applicant has agreed. The project has been conditioned accordingly. Please see Exhibit A. The proposed modified elevations include the required banding.

(3) The architecture, including the character, scale and quality of the design, relationship with the site and other buildings, building materials, screening of exterior appurtenances, exterior lighting and signing and similar elements establishes a clear design concept and is compatible with the character of existing or anticipated buildings on adjoining and nearby properties.

As indicated above staff believes the proposed design, including the use of the Nichihwa products, of the building is compatible with the character of the existing building and properties in the area. The applicant is proposing a 6 foot board on board fence surrounding the trash/recycling bins on the east side of the building.

As previously discussed, staff did administratively approve the applicant’s request to substitute a six (6) foot board on board fence enclosure around the mechanical equipment located at the back of the building in place of the originally approved concrete block wall. The reason that staff approved the applicant’s request as that it was brought to staff’s attention that the wood fence would actually attenuate noise better that the concrete block wall enclosure.

Staff has previously addressed the proposed exterior lighting associated with the project. In
regards to signage, Section 17.30.260 of the RDMC identifies the City’s sign regulations. Basically, appurtenant signs are allowed 3 square feet for every foot of street frontage with a maximum limit of 300 square feet. The proposed pylon sign is 10 feet by 5 feet and is double sided. It’s been the City’s policy to count both sides of a double sided sign. As such the pylon sign is 100 square feet in size. The proposed sign or lettering on the building is approximately 3 feet tall and approximately 37 feet long or 111 square feet. Staff calculates free standing letters based on 75% of the area. As such the proposed signage is approximately 83 square feet. The total area of the proposed signage is approximately 183 square feet. As such, the proposed signage does comply with the City’s sign provisions.

(4) The proposed project will not create conflicts with vehicular, bicycle, or pedestrian transportation modes of circulation.

The site currently has 2 driveway access points into the property from Davis Street. The applicant is proposing to eliminate 1 driveway and widen the driveway near the east side of the property. The property is adjacent to the school access to the east. Students will be crossing the driveway approach going to and from school. The City Engineer has recommended some sort of driveway approach treatment (i.e. stripping or stamped concrete) to alert drivers that the driveway approach is a pedestrian crossing. The project has been conditioned accordingly. Please see Exhibit A.

Based on the information submitted, comments received from referral agencies, the use is allowed in the Community Commercial zone and complies with all other applicable provisions of Zoning Regulations, including parking, design review and signage.

2. General Plan Consistency

The proposed use is consistent with the General Plan and any applicable specific plan;

The General Plan designation is also Community Commercial. Commercial retail uses are considered principally permitted uses.

There are Land Use and Noise Element policies that require noise attenuation techniques to ensure compatibility with various land use types. As previously discussed, based on the noise levels of the mechanical equipment (82 decibels), staff originally recommended a 6 foot split face concrete block wall. Again, staff did administratively approve the applicant’s request to substitute a six (6) foot board on board fence enclosure around the mechanical equipment located at the back of the building. The approval was based on the fact that the wood fence would actually attenuate noise better that the concrete block wall enclosure. The original conditions of approval have been modified accordingly. Please see Exhibit A.

The General Plan also includes policies to encourage Low Impact Development (LID) techniques to minimize stormwater runoff and encourage groundwater recharge. The project has been conditioned to design stormwater facilities to accommodate a 25 year storm event, including the use of bio-swales and detention/retention facilities. Please refer to Exhibit A.
The General Plan also encourages landscaping to minimize visual impacts and ensure compatibility with adjacent and surrounding properties. The project has incorporated landscaping elements that will enhance the appearance of the project and the surrounding properties.

In addition, the proposed project is consistent with the following General Plan goal: "To promote a variety of commercial uses and allow light manufacturing in appropriate commercial areas."

There are no other goals or policies which would preclude the proposed use in the Community Commercial designation. Therefore, the proposed use is consistent with the General Plan.

3. California Environmental Quality Act

The primary purpose of the California Environmental Quality Act (CEQA) is to inform the decision makers and the public of potential environmental effects of a proposed project. Because the use is principally permitted, it is considered a ministerial project. Pursuant to Section 15268 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations ministerial projects are statutorily exempt.

Exhibit A: Existing and recommended Conditions of Approval.

Attachment 1: Proposed Modified Building Elevations.

Attachment 2: Resolution No. PC 082-2014 approving the modified Design Review Conditional Use Permit subject to the recommended Conditions of Approval in Exhibit A.
EXHIBIT A

Conditions of Approval

Dollar General Design Review Conditional Use Permit

File No. 052-222-009; Case No. DR-CUP 13-01 & DR-CUP 13-01M

Original Conditions of Approval

1. The applicant shall pay the $50.00 CEQA Notice of Exemption filing fee (payable to the County of Humboldt) within five (5) days of approval. All other associated processing fees must be paid within 30 days of billing.

2. The applicant shall revise the site plan and install 5 bicycle parking spaces/racks.

3. The applicant shall revise the hydraulics/drainage plan to accommodate a 25 year storm events so that there is no net increase of stormwater runoff from the site. The plan shall incorporate Low Impact Development (LID) stormwater techniques, including the use of detention/retention facilities and bio-swales.

4. Additional landscaping shall be provided along Wildwood Avenue and Davis Street adjacent to the parking area. The required landscaping shall be a minimum height of 18 inches. The applicant shall submit a revised Landscaping Plan demonstrating compliance with this condition.

5. The applicant shall submit verification from a qualified landscape professional that the proposed strawberry tress do not extend beyond the boundaries of the planting area and that they will not affect the sewer and storm drain laterals.

6. The applicant shall revise the site plan to include 2 additional trees adjacent to the parking area. A total of 7 trees are required adjacent to the parking area.

7. The applicant shall revise the Building Elevations to include a contrasting band of split or smooth face concrete block near the top of the building along the front and sides of the building to the satisfaction of the Planning Director.

8. The mechanical enclosure shall be constructed of split-face or a combination of split-face and smooth-face concrete block a wood on wood fence with a minimum height of 6 feet. The site plan and/or landscaping plan shall be revised accordingly.
9. The garbage/recycling area shall be screened/enclosed with a minimum 6 foot board on board fence and shall be secured at all times. The site plan and/or landscaping plan shall be revised accordingly.

10. The applicant shall construct a 6 foot board on board fence along the east property line to a point 30 feet north of the existing sidewalk. The remaining 30 feet shall be fenced with a 3 foot board on board fence.

11. The storm drain located within the proposed driveway approach shall be relocated outside the driveway approach to the satisfaction of the City Engineer and/or Streets Superintendent. The site plan and hydraulics/drainage plan shall be revised accordingly.

12. The applicant shall stamp or stripe a pedestrian crossing across the driveway approach to the satisfaction of the City.

13. A Grading and Erosion Control plan incorporating Best Management Practices (BMP’s) shall be submitted to the City for review and approval prior to the issuance of any building permits.

14. The applicant shall obtain a General Permit from the Regional Water Quality Control Board (RWQCB). The applicant shall submit a copy of the approved Permit, including a copy of the required Storm Water Pollution Prevention Plan (SWPPP). If the Regional Water Quality Control Board (RWQCB) does not require a Permit, the applicant shall submit written evidence as such.

15. The applicant shall grant public utility easements to the City for the existing water, sewer and stormwater facilities crossing the parcel.

16. The applicant shall submit Improvement Plans for review and approval.

*Modification Conditions of Approval (March 2014)*

1M. The applicant shall construct a 6 foot board on board fence along the north property line to a point 30 feet east of the existing sidewalk. The remaining 30 feet shall be fenced with a 3 foot board on board fence.

2M. The back (north) wall of the building shall be constructed (treated) with the Nichiha materials to match the other exterior elevations of the building.
Operational Conditions

1. All outdoor storage materials and equipment shall be screened from public view.

2. The building, parking lot, stripping and landscaping shall be maintained in good condition. The stripping shall be permanently maintained in a clear and visible manner.

3. The storm drain system, including the detention/retention basin shall be maintained to ensure it works properly.

Informational Notes

1. If potential archaeological resources, paleontological resources or human remains are unearthed during grading activities, all work ground disturbing activities shall be stopped and a qualified archaeologist funded by the applicant and approved by the City of Rio Dell and the Bear River Band of the Wiyot Nation, shall be contracted to evaluate the find, determine its significance, and identify any required mitigation (e.g., data recovery, resource recovery, in-situ preservation/capping, etc.). Any such mitigation shall be implemented by the developer prior to resumption of any ground disturbing activities.

2. In accordance with California Health and Safety Code §7050.5 and California Public Resources Code §5097.94 and 5097.98, if human remains are uncovered during project subsurface construction activities, all work shall be suspended immediately and the City of Rio Dell, Humboldt County Coroner and the Bear River Band of the Wiyot Nation shall be immediately notified. If the remains are determined by the Coroner to be Native American in origin, the Native American Heritage Commission (NAHC) shall be notified within 24 hours of the determination, and the guidelines of the NAHC shall be adhered to in the treatment and disposition of the remains.
RESOLUTION NO. PC 082 – 2013

RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF RIO DELL
APPROVING THE DOLLAR GENERAL DESIGN REVIEW CONDITIONAL USE PERMIT MODIFICATION:

WHEREAS the Zaremba Group made application on behalf of the Dollar General Corporation for a 9,100 square foot Dollar General store located at 44 Davis Street; and

WHEREAS the parcel is zoned Community Commercial (CC). The purpose of the Community Commercial zone is to provide for large-scale commercial uses; and

WHEREAS the proposed use is principally permitted. However, the project is subject to the City’s Design Review regulations, Section 17.25.050 et seq of the Rio Dell Municipal Code; and

WHEREAS the City processed the application pursuant to Section 17.25.050 of the Rio Dell Municipal Code; and

WHEREAS the project as originally proposed, conditioned and modified to utilize Nichiha fiber-cement siding is consistent with the City’s adopted Design Review Guiding Principles and Concepts, which are:

- To encourage high quality land/site planning, architecture and landscape design;
- To ensure physical, visual, and functional compatibility between uses; and
- To ensure proper attention is paid to site and architectural design, thereby protecting land values.

WHEREAS the proposed project has been processed in accordance with the applicable provisions of the California Government Code and the California Environmental Quality Act (CEQA); and
NOW, THEREFORE, BE IT RESOLVED that the Planning Commission of the City of Rio Dell finds that as conditioned:

- The proposed use is allowed within the applicable zoning district and complies with all other applicable provisions of Rio Dell Municipal Code; and

- The proposed use is consistent with the General Plan and any applicable specific plan; and

- The proposed use in consistent with the City’s Design Review regulations; and

- The proposed architecture, site design, and landscape are suitable for the purposes of the building and the site and will enhance the character of the neighborhood and community; and

- The architecture, including the character, scale and quality of the design, relationship with the site and other buildings, building materials, screening of exterior appurtenances, exterior lighting and signing and similar elements establishes a clear design concept and is compatible with the character of existing or anticipated buildings on adjoining and nearby properties; and

- The proposed project will not create conflicts with vehicular, bicycle, or pedestrian transportation modes of circulation; and

- The use is principally permitted and is considered a ministerial project. Pursuant to Section 15268 of the CEQA Guidelines, Title 14, Chapter 3 of the California Code of Regulations ministerial projects are statutorily exempt.

I HEREBY CERTIFY that the forgoing Resolution was PASSED and ADOPTED at a regular meeting of the Planning Commission of the City of Rio Dell on March 27, 2014 by the following vote:

AYES:
NOES:
ABSENT:
ABSTAIN:

Gary Chapman, Chairperson
ATTEST:

I, Karen Dunham, City Clerk for the City of Rio Dell, State of California, hereby certify the above and foregoing to be a full, true and correct copy of Resolution No. PC 082-2014 adopted by the Planning Commission of the City of Rio Dell on March 27, 2014.

Karen Dunham, City Clerk, City of Rio Dell
For Meeting of: March 27, 2014

To: Planning Commission

From: Kevin Caldwell, Community Development Director

Through: Jim Sketch, City Manager

Date: February 18, 2014

Subject: Text Amendment Establishing Density Bonus Regulations, Sections 17.30.073 of the Rio Dell Municipal Code

Recommendation:

That the City Council:

1. Receive staff’s report regarding the proposed text amendment;

2. Open the public hearing, receive public input, and deliberate; and

3. Find that:

   (a) The proposed text amendment is consistent with the General Plan; and

   (b) The proposed text amendment has been processed in accordance with the applicable provisions of the California Government Code and the California Environmental Quality Act (CEQA);

Background

State Density Bonus Law, Government Code Section 65915, was first enacted in 1979. In 2005 significant changes were made to the State’s Density Bonus Law, including a requirement that Cities and Counties adopt local regulations implementing Government Code Section 65915.

The law requires local governments to provide density bonuses and other incentives to developers of affordable housing who commit to providing a certain percentage of dwelling units to persons whose income do not exceed specific thresholds. Cities also must provide bonuses to certain developers of senior housing developments, and in response to certain donations of land and the inclusion of childcare centers in some developments.

Essentially, state density bonus law establishes that a residential project of five or more units that provides affordable or senior housing at specific affordability levels may be eligible for:

- a "density bonus" to allow more dwelling units than otherwise allowed on the site by the applicable General Plan Land Use Map and Zoning;
- use of density bonus parking standards;
- incentives reducing site development standards or a modification of zoning code or architectural requirements that result in financially sufficient and actual cost reductions;
- waiver of development standards that would otherwise make the increased density physically impossible to construct;
- an additional density bonus if a childcare facility is provided.

The density bonus may be approved only in conjunction with a development permit (i.e., tentative map, parcel map, use permit or design review). Under State law, a jurisdiction must provide a density bonus, and incentives will be granted at the applicant’s request based on specific criteria. These bonuses and incentives will be granted based on the following criteria:

<table>
<thead>
<tr>
<th>Target Group*</th>
<th>Target Units</th>
<th>Density Bonus</th>
<th>Incentives</th>
</tr>
</thead>
<tbody>
<tr>
<td>Very Low Income(1)</td>
<td>5%</td>
<td>20%</td>
<td>1</td>
</tr>

State Density Bonus law provides that if the criteria above are met then the jurisdiction essentially has no grounds for denying density bonuses or use of the density bonus parking standards. A jurisdiction has limited grounds for denying incentives and waivers. A jurisdiction can deny incentives and waivers if, for example, (1) it violates state or federal laws, (2) it is not needed economically (for incentives only), (3) there are adverse health and safety effects, (4) there is an impact on an historic structure, and, for waivers only, (5) it does not physically preclude development.

If a child care center is also included in the affordable or senior housing development, the local agency shall grant either an additional density bonus equal to or greater than the amount of square feet of the child care center or grant an additional incentive that contributes significantly to the economic feasibility of the construction of the child care facility, with the following additional requirements:

- The child care facility shall remain in operation for a period of time as long as the term of the affordable units;
- The percentage of children from very low-, low- and moderate income-families reflects the percentage of affordable units in the development;
The local agency shall not be required to provide a density bonus or concession for a child care facility if it finds that the community has adequate child care facilities.

Discussion

Even without local Density Bonus regulations, the City is obligated to consider and approve density bonuses if the State criteria is met. However, now the City is obligated to adopt a local Density Bonus Ordinance. The proposed Ordinance would formalize the process for implementing the review of density bonuses and related parking standards, incentives and waivers. Staff has crafted the ordinance to rely, as much as possible, on the standards and requirements contained in State law, so that if provisions in State law are amended in the future, the City's regulations will not necessarily need to be amended.

State Density Bonus Law includes the following definitions of terms used in the proposed regulations:

Density Bonus (Section 65915(f))
For the purposes of the Density Bonus regulations, "density bonus" means a density increase over the otherwise maximum allowable residential density as of the date of application by the applicant to the city, county or city and county. The applicant may elect to accept a lesser percentage of a density bonus. The amount of density bonus to which the applicant is entitled shall vary according to the amount by which the percentage of affordable housing units exceeds the percentage established in subdivision (b).

Concession or Incentive (Section 65915(k))
For the purposes of the Density Bonus regulations, concession or incentive means any of the following:

1. A reduction in site development standards or a modification of zoning code requirements or architectural design requirements that exceed the minimum building standards approved by the California Building Standards Commission as provided in Part 2.5 (commencing with Section 18901) of Division 13 of the Health and Safety Code, including, but not limited to, a reduction in setback and square footage requirements and in the ratio of vehicular parking spaces that would otherwise be required that results in identifiable, financially sufficient, and actual cost reductions.

2. Approval of mixed use zoning in conjunction with the housing project if commercial, office, industrial, or other land uses will reduce the cost of the housing development and if the commercial, office, industrial, or other land uses are compatible with the housing project and the existing or planned development in the area where the proposed housing project will be located.

3. Other regulatory incentives or concessions proposed by the developer of the city, county or city and county that result in identifiable, financially sufficient, and actual cost reductions.
The provisions of the recommended Density Bonus Regulations are summarized below in Table 4.

<table>

<tbody>
<tr>
<td><strong>Purpose</strong></td>
<td>The purpose of these regulations is to adopt an ordinance that specifies how compliance with Government Code Section 65915 (&quot;State Density Bonus Law&quot;) will be implemented in an effort to encourage the production of affordable housing units in developments proposed within the City.</td>
<td>The purpose is to implement State Density Bonus Law and encourage production of affordable housing.</td>
</tr>
<tr>
<td><strong>Definitions</strong></td>
<td>Unless otherwise specified in the regulations, the definitions found in State Density Bonus Law shall apply to the terms contained herein.</td>
<td>Definitions in State Bonus Density law will apply</td>
</tr>
<tr>
<td><strong>Applicability</strong></td>
<td>This Chapter shall apply to all zoning districts, including mixed use zoning districts, where residential developments of five or more dwelling units are proposed and where the applicant seeks and agrees to provide low, very-low or moderate income or senior housing units in the threshold amounts specified in State Density Bonus Law such that the resulting density is beyond that which is permitted by the applicable zoning. This Chapter and State Density Bonus Law shall apply only to the residential component of a mixed use project and shall not operate to increase the allowable density of the non-residential component of any proposed project.</td>
<td>Applicability is for development of five units or more, per the definition of &quot;housing development&quot; provided in Section 65915(i).</td>
</tr>
<tr>
<td><strong>Application Requirements</strong></td>
<td>A. Any applicant requesting a density bonus, incentive(s), waiver(s) and/or use of density bonus parking standards pursuant to State Density Bonus Law shall provide the City with a written proposal. The proposal shall be submitted prior to or concurrently with the filing of the planning application for the housing development and shall be processed in conjunction with the underlying application.</td>
<td>A request for a density bonus shall be made in writing. A request for an incentive will require a pro forma or other report showing &quot;identifiable, financially sufficient and actual cost reductions&quot; because that is the standard the City is allowed to utilize to review the request.</td>
</tr>

<td><strong>Application Requirements</strong> Continued...</td>
<td><strong>B. The proposal for a density bonus, incentive(s) and/or waiver(s) pursuant to State Density Bonus Law shall include the following information:</strong>&lt;br&gt;1. Requested density bonus. The specific requested density bonus proposal shall include evidence that the project meets the thresholds for State Density Bonus Law. The proposal shall also include calculations showing the maximum base density, the number/percentage of affordable units and identification of the income level at which such units will be restricted, additional market rate units resulting from the density bonus allowable under State Density Bonus Law and the resulting unit per acre density. The density bonus units shall not be included in determining the percentage of base units that qualify a project for a density bonus pursuant to State Density Bonus Law.&lt;br&gt;2. Requested incentive(s). The request for particular incentive(s) shall include a pro forma or other report evidencing that the requested incentive(s) results in identifiable, financially sufficient and actual cost reductions that are necessary to make the housing units economically feasible. The report shall be sufficiently detailed to allow the City to verify its conclusions. If the City requires the services of specialized financial consultants to review and corroborate the analysis, the applicant will be responsible for all costs incurred in reviewing the documentation.&lt;br&gt;3. Requested Waiver(s). The written proposal shall include an explanation of the waiver(s) of development standards requested and why they are necessary to make the construction of the project physically possible. Any requested waiver(s) shall not exceed the limitations provided by Section 17.30.073(8) and to the extent such limitations are exceeded will be...</td>
<td><strong>A request for a waiver of development standards shall specify why the waiver is necessary to make the construction of the project physically possible.</strong></td>
</tr>
<tr>

<tr>
<td>Application</td>
<td><strong>Requirements</strong></td>
<td>As with all projects, applicants are required to pay &quot;actual costs&quot;.</td>
</tr>
<tr>
<td></td>
<td><em>Continued...</em></td>
<td></td>
</tr>
<tr>
<td><strong>Density Bonus</strong></td>
<td>A. A density bonus for a housing development means a density increase over the otherwise maximum allowable residential density under the applicable zoning and land use designation on the date the application is deemed complete. The amount of the allowable density bonus shall be calculated as provided in State Density Bonus Law. The applicant may select from only one of the income categories identified in State Density Bonus Law and may not combine density bonuses from different income categories to achieve a larger density bonus. B. The body with approval authority for the planning approval sought will approve, deny or modify the request for a density bonus, incentive, waiver or use of density bonus parking standards in accordance with State Density Bonus Law and these regulations. Additionally, nothing herein prevents the City from granting a greater density bonus and additional incentives or waivers than that provided for herein, or from providing a lesser density bonus and fewer incentives and waivers than that provided for herein, when the housing development does not meet the minimum thresholds.</td>
<td>The review and approval of the request would be by the body with approval authority for the planning approval sought. For example, the Planning Commission would review a request submitted with a Subdivision or Use Permit. The Planning Commission and City Council would review a request submitted with a Rezoning/General Plan Amendment.</td>
</tr>
<tr>
<td><strong>Incentives</strong></td>
<td>A. The number of incentives granted shall be based upon the number the applicant is entitled to pursuant to State Density Bonus Law. B. An incentive includes a reduction in site development standards or a modification of zoning code requirements or architectural requirements that result in identifiable,</td>
<td>This section references State Density Bonus Law for the review of incentives, including grounds for denial.</td>
</tr>
<tr>
<td>Provision</td>
<td>Proposed</td>
<td>Comments/Options</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Incentives</td>
<td>financially sufficient and actual cost reductions. An incentive may be the approval of mixed use zoning (e.g. commercial) in conjunction with a housing project if the mixed use will reduce the cost of the housing development and is compatible with the housing project. An incentive may, but need not be, the provision of a direct financial incentive, such as the waiver of fees. C. A requested incentive may be denied only for those reasons provided in State Density Bonus Law. Denial of an incentive is a separate and distinct act from a decision to deny or approve the entirety of the project.</td>
<td></td>
</tr>
<tr>
<td>Discretionary Approval Authority Retained</td>
<td>The granting of a density bonus or incentive(s) shall not be interpreted in and of itself to require a general plan amendment, zoning change or other discretionary approval. If an incentive would otherwise trigger one of these approvals, when it is granted as an incentive, no general plan amendment, zoning change or other discretionary approval is required. However, if the base project without the incentive requires a general plan amendment, zoning change or other discretionary approval, the City retains discretion to make or not make the required findings for approval of the base project.</td>
<td>The granting of a density bonus or incentive does not trigger the need for a general plan amendment, zoning change or other approval (65915(j)). As an example, if a Use Permit for a development project at 35 units per acre is consistent with the maximum density allowed by the General Plan and Zoning, but the applicant seeks a density bonus that results in a density of more than 35 units per acre, a General Plan Amendment or Rezoning is not required.</td>
</tr>
<tr>
<td>Waivers</td>
<td>A waiver is a modification to a development standard such that construction at the increased density would be physically possible. Development standards, include, but are not limited to, a height limitation, a setback requirement, minimum floor areas, an onsite open space requirement, or a parking ratio that applies to a residential development. An</td>
<td>To request a waiver of a development standard, the applicant must show that without the waiver, the project would be physically impossible to construct (65915(e)).</td>
</tr>
<tr>
<td>Provision</td>

<td>------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Waivers</td>
<td>applicant may request a waiver of any development standard to make the project physically possible to construct at the increased density. To be entitled to the requested waiver, the applicant must show that without the waiver, the project would be physically impossible to construct. There is no limit on the number of waivers.</td>
<td></td>
</tr>
<tr>
<td>Affordable Housing Agreement</td>
<td>Prior to issuance of a building permit, the applicant shall enter into an Affordable Housing Agreement with the City to the satisfaction of the City Attorney guaranteeing the affordability of the rental or ownership units for a minimum of thirty (30) years, identifying the type, size and location of each affordable unit and containing requirements for administration, reporting and monitoring. Such Affordable Housing Agreement shall be recorded in the Humboldt County Recorder's Office.</td>
<td>The minimum term of 30 years for affordable units is specified in Section 65915(c)(1).</td>
</tr>
</tbody>
</table>
| Design and Quality        | A. Affordable units must be constructed concurrently with market-rate units and shall be integrated into the project. Affordable units shall be of equal design and quality as the market rate unit. Exteriors and interiors, including architecture, elevations, floor plans, interior finishes and amenities of the affordable units shall be similar to the market rate units. The number of bedrooms in the affordable units shall be consistent with the mix of market rate units. This section may be waived or modified on a case by case basis for affordable housing units developed for special groups, including housing for special needs or seniors.  
B. Parking standards may be modified as allowable under the State Density Bonus Law and anything beyond those standards shall be considered a request for an incentive. | Affordable units shall be constructed concurrently and integrated into the project with equal design and quality as the market rate units. This section may be waived or modified for affordable units developed for special groups, such as housing for special needs or seniors. Such housing may need to be grouped for financing or design reasons. |
Procedures for Zoning Ordinance Amendments

Pursuant to Section 17.35.010 of the City of Rio Dell Municipal Code, the following City procedures are required to amend the Ordinance:

- An amendment may be initiated by one or more owners of property affected by the proposed amendment, as set out in Section 17.35.010(3), or by action of the Planning Commission, or the City Council.

- The application of one or more property owners for the initiation of an amendment shall be filed in the office of the City Clerk on a form provided, accompanied by a filing fee.

- Subject only to the rules regarding the placing of matters on the Planning Commission agenda, the matter shall be set for a public hearing.

- Notice of hearing time and place shall be published once in a newspaper of general circulation at least ten calendar days before the hearing or by posting in at least three public places.

- At the public hearing, the Planning Commission shall hear any person affected by the proposed amendment. The hearing may be continued from time to time.

- Within 40 days of the conclusion of the hearing, the Planning Commission shall submit to the City Council a written report of recommendations and reasons therefore.

- Subject only to the rules regarding the placing of matters on its agenda, the City Council, at its next regular meeting following the receipt of such report, shall cause the matter to be set for a public hearing. Notice of the time and place of the hearing shall be given as provided in Section 17.35.010(5), hereof.

- At the public hearing, the City Council shall hear any person affected by the proposed amendment. The hearing may be continued to a specified future date, but shall be concluded within 60 days of the commencement thereof.

- The City Council shall not make any change in the proposed amendment until the proposed change has been referred to the Planning Commission for a report, and the Planning Commission report has been filed with the City Council.

Zone Reclassification Required Findings:

1. The proposed amendment is consistent and compatible with the General Plan and any implementation programs that may be affected.
The proposed establishment of Density Bonus regulations is consistent with the Goals and Policies of the General Plan. Goal A of the Housing Element calls for “A variety of housing types to meet the needs of all economic segments of the community including those with special housing requirements.” Policy A-5 of the Housing Element encourages density bonuses for developments providing housing for low to moderate income households and for qualifying senior housing projects. In addition, the Action Plan of the Housing Element calls for the development of a Density Bonus Ordinance consistent with State law.

2. The proposed amendments have been processed in accordance with the California Environmental Quality Act (CEQA).

The primary purpose of the California Environmental Quality Act (CEQA) is to inform the decision makers and the public of potential environmental effects of a proposed project.

Based on the nature of the project, staff has determined that the proposed Density Bonus Ordinance is exempt from the California Environmental Quality Act (CEQA) because: (1) the Ordinance is not a discretionary project pursuant to Public Resources Code Section 21080(a); and (2) the Ordinance is a ministerial project pursuant to Public Resources Code Section 21080(b) and CEQA Guideline Section 15268(a) since the Ordinance simply adopts the density bonus standards otherwise required by Government Code Section 65915. Therefore, the Density Bonus Ordinance is exempt from CEQA pursuant to CEQA Guidelines 15061(b)(1), 15061(b)(2) and 15061(b)(3).

Financial Impact

The City is responsible for the costs associated with the proposed amendment. The cost is insignificant and will not result in additional budget expenditures or revisions.

RESOLUTION NO. PC 078 – 2013

CITY OF

RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF RIO DELL
RECOMMENDING ESTABLISHING DENSITY BONUS REGULATIONS,
SECTION 17.30.073 OF THE RIO DELL MUNICIPAL CODE:

WHEREAS State Density Bonus Law, Government Code Section 65915, was first enacted in 1979; and

WHEREAS in 2005 significant changes were made to the State’s Density Bonus Law, including a requirement that Cities and Counties adopt local regulations implementing Government Code Section 65915; and

WHEREAS the law requires local governments to provide density bonuses and other incentives to developers of affordable housing who commit to providing a certain percentage of dwelling units to persons whose income do not exceed specific thresholds; and

WHEREAS cities also must provide bonuses to certain developers of senior housing developments, and in response to certain donations of land and the inclusion of childcare centers in some developments; and

WHEREAS the density bonus may be approved only in conjunction with a development permit (i.e., tentative map, parcel map, use permit or design review); and

WHEREAS under State law, a jurisdiction must provide a density bonus, and incentives will be granted at the applicant’s request based on specific criteria; and

WHEREAS State Density Bonus law provides that if certain criteria is met then the jurisdiction essentially has no grounds for denying density bonuses or use of the density bonus parking standards; and

WHEREAS a jurisdiction has limited grounds for denying incentives and waivers. A jurisdiction can deny incentives and waivers if, for example, (1) it violates state or federal laws, (2) it is not needed economically (for incentives only), (3) there are adverse health and safety effects, (4) there is an impact on an historic structure, and, for waivers only, (5) it does not physically preclude development; and

Density Bonus Regulations PC Resolution February 26, 2014

ATTACHMENT 1
WHEREAS the proposed establishment of Density Bonus regulations is consistent with the Goals and Policies of the General Plan. Goal A of the Housing Element calls for “A variety of housing types to meet the needs of all economic segments of the community including those with special housing requirements.”; and

WHEREAS Policy A-5 of the Housing Element encourages density bonuses for developments providing housing for low to moderate income households and for qualifying senior housing projects. In addition, the Action Plan of the Housing Element calls for the development of a Density Bonus Ordinance consistent with State law; and

WHEREAS the City has reviewed and processed the proposed amendment in conformance with Sections 65350 – 65362 of the California Government Code; and

WHEREAS the City has reviewed and processed the proposed amendment in conformance with Section 17.35.010 of the City of Rio Dell Municipal Code; and

WHEREAS the City finds that based on evidence on file and presented in the staff report that the proposed amendment is consistent and compatible with the General Plan and any implementation programs that may be affected; and

WHEREAS the proposed amendment has been processed in accordance with the applicable provisions of the California Government Code and the California Environmental Quality Act (CEQA); and

NOW, THEREFORE, BE IT RESOLVED that the Planning Commission of the City of Rio Dell finds that:

1. The proposed amendment is consistent with the General Plan and any applicable specific plan; and

2. Based on the nature of the project, staff has determined that the proposed Density Bonus Ordinance is exempt from the California Environmental Quality Act (CEQA) because: (1) the Ordinance is not a discretionary project pursuant to Public Resources Code Section 21080(a); and (2) the Ordinance is a ministerial project pursuant to Public Resources Code Section 21080(b) and CEQA Guideline Section 15268(a) since the Ordinance simply adopts the density bonus standards otherwise required by Government Code Section 65915. Therefore, the Density Bonus Ordinance is exempt from CEQA pursuant to CEQA Guidelines 15061(b)(1), 15061(b)(2) and 15061(b)(3).

NOW, THEREFORE, BE IT FURTHER RESOLVED that the Planning Commission of the City of Rio Dell recommends that the City Council establish Density Bonus Regulations, Section 17.30.073 of the Rio Dell Municipal Code.
I HEREBY CERTIFY that the forgoing Resolution was PASSED and ADOPTED at a regular meeting of the Planning Commission of the City of Rio Dell on March 27, 2014 by the following vote:

AYES:

Gary Chapman, Chairperson

ATTEST:

I, Karen Dunham, City Clerk for the City of Rio Dell, State of California, hereby certify the above and foregoing to be a full, true and correct copy of Resolution No. PC 078-2014 adopted by the Planning Commission of the City of Rio Dell on March 27, 2014.

__________________________________________
Karen Dunham, City Clerk, City of Rio Dell
ORDINANCE NO. 318 – 2014

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF RIO DELL
ESTABLISHING DENSITY BONUS REGULATIONS,
SECTION 17.30.073 OF THE RIO DELL MUNICIPAL CODE

THE CITY COUNCIL OF THE CITY OF RIO DELL ORDAINS AS FOLLOWS:

WHEREAS State Density Bonus Law, Government Code Section 65915, was first enacted in 1979; and

WHEREAS in 2005 significant changes were made to the State’s Density Bonus Law, including a requirement that Cities and Counties adopt local regulations implementing Government Code Section 65915; and

WHEREAS the law requires local governments to provide density bonuses and other incentives to developers of affordable housing who commit to providing a certain percentage of dwelling units to persons whose income do not exceed specific thresholds; and

WHEREAS cities also must provide bonuses to certain developers of senior housing developments, and in response to certain donations of land and the inclusion of childcare centers in some developments; and

WHEREAS the density bonus may be approved only in conjunction with a development permit (i.e., tentative map, parcel map, use permit or design review); and

WHEREAS under State law, a jurisdiction must provide a density bonus, and incentives will be granted at the applicant’s request based on specific criteria; and

WHEREAS State Density Bonus law provides that if certain criteria is met then the jurisdiction essentially has no grounds for denying density bonuses or use of the density bonus parking standards; and

WHEREAS a jurisdiction has limited grounds for denying incentives and waivers. A jurisdiction can deny incentives and waivers if, for example, (1) it violates state or federal laws, (2) it is not needed economically (for incentives only), (3) there are adverse health
and safety effects, (4) there is an impact on an historic structure, and, for waivers only, (5) it does not physically preclude development; and

WHEREAS the proposed establishment of Density Bonus regulations is consistent with the Goals and Policies of the General Plan. Goal A of the Housing Element calls for "A variety of housing types to meet the needs of all economic segments of the community including those with special housing requirements."; and

WHEREAS Policy A-5 of the Housing Element encourages density bonuses for developments providing housing for low to moderate income households and for qualifying senior housing projects. In addition, the Action Plan of the Housing Element calls for the development of a Density Bonus Ordinance consistent with State law; and

WHEREAS the City has reviewed and processed the proposed amendment in conformance with Sections 65350 – 65362 of the California Government Code; and

WHEREAS the City has reviewed and processed the proposed amendment in conformance with Section 17.35.010 of the City of Rio Dell Municipal Code; and

WHEREAS the City finds that based on evidence on file and presented in the staff report that the proposed amendment is consistent and compatible with the General Plan and any implementation programs that may be affected; and

WHEREAS the proposed amendment has been processed in accordance with the applicable provisions of the California Government Code and the California Environmental Quality Act (CEQA); and

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Rio Dell does hereby ordain as follows:

Section 1.

17.30.073 Density Bonus

Section 17.30.073(1) Purpose.

The purpose of this Chapter is to adopt an ordinance that specifies how compliance with Government Code Section 65915 ("State Density Bonus Law") will be implemented in an effort to encourage the production of affordable housing units in developments proposed within the City.

Section 17.30.073(2) Definitions.

Unless otherwise specified in this Chapter, the definitions found in State Density Bonus
Law shall apply to the terms contained herein.

Section 17.30.073(3) Applicability.

These regulations shall apply to all zoning districts where residential developments of five or more dwelling units are proposed and where the applicant seeks and agrees to provide low, very-low or moderate income or senior housing units in the threshold amounts specified in State Density Bonus Law such that the resulting density is beyond that which is permitted by the applicable zoning. These regulations and State Density Bonus Law shall apply only to the residential component of a mixed use project and shall not operate to increase the allowable density of the nonresidential component of any proposed project.

Section 17.30.073(4) Application Requirements.

(a) Any applicant requesting a density bonus, incentive(s), waiver(s) and/or use of density bonus parking standards. The proposal shall be submitted prior to or concurrently with the filing of the planning application for the housing development and shall be processed in conjunction with the underlying application.

(b) The proposal for a density bonus, incentive(s) and/or waiver(s) pursuant to State Density Bonus Law shall include the following information:

1. Requested density bonus. The specific requested density bonus proposal shall include evidence that the project meets the thresholds for State Density Bonus Law. The proposal shall also include calculations showing the maximum base density, the number/percentage of affordable units and identification of the income level at which such units will be restricted, additional market rate units resulting from the density bonus allowable under State Density Bonus Law and the resulting unit per acre density. The density bonus units shall not be included in determining the percentage of base units that qualify a project for a density bonus pursuant to State Density Bonus Law.

2. Requested incentive(s). The request for particular incentive(s) shall include a pro forma or other report evidencing that the requested incentive(s) results in identifiable, financially sufficient and actual cost reductions that are necessary to make the housing units economically feasible. The report shall be sufficiently detailed to allow the City to verify its conclusions. If the City requires the services of specialized financial consultants to review and corroborate the analysis, the applicant will be responsible for all costs incurred in reviewing the documentation.

3. Requested Waiver(s). The written proposal shall include an explanation of the waiver(s) of development standards requested and why they are necessary to make the construction of the project physically possible. Any requested waiver(s) shall not exceed the limitations provided by Section 17.30.073(8) and to the extent such limitations are
exceeded will be considered as a request for an incentive pursuant to Section 17.30.073(6).

4. Fee. Payment of the fee/deposit in an amount set by resolution of the City Council to reimburse the City for staff time spent reviewing and processing the State Density Bonus Law application submitted pursuant to these regulations.

Section 17.30.073(5) Density Bonus.

(a) A density bonus for a housing development means a density increase over the otherwise maximum allowable residential density under the applicable zoning and land use designation on the date the application is deemed complete. The amount of the allowable density bonus shall be calculated as provided in State Density Bonus Law. The applicant may select from only one of the income categories identified in State Density Bonus Law and may not combine density bonuses from different income categories to achieve a larger density bonus.

(b) The body with approval authority for the planning approval sought will approve, deny or modify the request for a density bonus, incentive, waiver or use of density bonus parking standards in accordance with State Density Bonus Law and these regulations. Additionally, nothing herein prevents the City from granting a greater density bonus and additional incentives or waivers than that provided for herein, or from providing a lesser density bonus and fewer incentives and waivers than that provided for herein, when the housing development does not meet the minimum thresholds.

Section 17.30.073(6) Incentives

(a) The number of incentives granted shall be based upon the number the applicant is entitled to pursuant to State Density Bonus Law.

(b) An incentive includes a reduction in site development standards or a modification of zoning code requirements or architectural requirements that result in identifiable, financially sufficient and actual cost reductions. An incentive may be the approval of mixed use zoning (e.g. commercial) in conjunction with a housing project if the mixed use will reduce the cost of the housing development and is compatible with the housing project. An incentive may, but need not be, the provision of a direct financial incentive, such as the waiver of fees.

(c) A requested incentive may be denied only for those reasons provided in State Density Bonus Law. Denial of an incentive is a separate and distinct act from a decision to deny or approve the entirety of the project.
Section 17.30.073(7) Discretionary Approval Authority Retained.

The granting of a density bonus or incentive(s) shall not be interpreted in and of itself to require a general plan amendment, zoning change or other discretionary approval. If an incentive would otherwise trigger one of these approvals, when it is granted as an incentive, no general plan amendment, zoning change or other discretionary approval is required. However, if the base project without the incentive requires a general plan amendment, zoning change or other discretionary approval, the City retains discretion to make or not make the required findings for approval of the base project.

Section 17.30.073(8) Waivers.

A waiver is a modification to a development standard such that construction at the increased density would be physically possible. Development standards, include, but are not limited to, a height limitation, a setback requirement, minimum floor areas, an onsite open space requirement, or a parking ratio that applies to a residential development. An applicant may request a waiver of any development standard to make the project physically possible to construct at the increased density. To be entitled to the requested waiver, the applicant must show that without the waiver, the project would be physically impossible to construct. There is no limit on the number of waivers.

Section 17.30.073(9) Affordable Housing Agreement

Prior to issuance of a building permit, the applicant shall enter into an Affordable Housing Agreement with the City to the satisfaction of the City Attorney guaranteeing the affordability of the rental or ownership units for a minimum of thirty (30) years, identifying the type, size and location of each affordable unit and containing requirements for administration, reporting and monitoring. Such Affordable Housing Agreement shall be recorded in the Humboldt County Recorder's Office.

Section 17.30.073(10) Design and Quality.

(a) Affordable units must be constructed concurrently with market-rate units and shall be integrated into the project. Affordable units shall be of equal design and quality as the market rate unit. Exteriors and interiors, including architecture, elevations, floor plans, interior finishes and amenities of the affordable units shall be similar to the market rate units. The number of bedrooms in the affordable units shall be consistent with the mix of market rate units. This section may be waived or modified on a case by case basis for affordable housing units developed for special groups, including housing for special needs or seniors.

(b) Parking standards may be modified as allowable under the State Density Bonus Law and anything beyond those standards shall be considered a request for an incentive.

Density Bonus Ordinance No. 318-2014 February 2014

65
Section 2. Severability

If any provision of the ordinance is invalidated by any court of competent jurisdiction, the remaining provisions shall not be affected and shall continue in full force and effect.

Section 3. Limitation of Actions

Any action to challenge the validity or legality of any provision of this ordinance on any grounds shall be brought by court action commenced within ninety (90) days of the date of adoption of this ordinance.

Section 4. Effective Date

This ordinance becomes effective thirty (30) days after the date of its approval and adoption.

I HEREBY CERTIFY that the forgoing Ordinance was duly introduced at a regular meeting of the City Council of the City of Rio Dell on March 18, 2014 and furthermore the forgoing Ordinance was passed, approved and adopted at a regular meeting of the City Council of the City of Rio Dell, held on the April 1, 2014 by the following vote:

AYES:

ATTEST:

Jack Thompson, Mayor

I, Karen Dunham, City Clerk for the City of Rio Dell, State of California, hereby certify the above and foregoing to be a full, true and correct copy of Ordinance No. 318-2014 which was passed, approved and adopted at a regular meeting of the City Council of the City of Rio Dell, held on the April 1, 2014.

Karen Dunham, City Clerk, City of Rio Dell
The Density Bonus Law: Has Its Time Finally Arrived?

By David H. Blackwell

I. INTRODUCTION

The confluence of a declining single-family market and a growing emphasis on “smart growth” infill projects has created an increased demand for urban multifamily development. These projects, particularly those that include affordable housing units, face considerable financial and political constraints. To make such projects feasible, some California developers rely on California’s Density Bonus Law. In general, this statute allows developers whose housing development proposals meet certain thresholds of affordability to receive density bonuses, incentives, and development waivers from the local agency.

The Density Bonus Law is not well-organized, however, and its application by cities and counties (collectively “cities”) varies considerably throughout the state. As noted during the most recent attempt to clean up the statute in 2008:

Due to the substantial changes the law has undergone over the years, it is confusing to interpret and is the subject of numerous debates as to both its intent and its actual requirements. Developers and cities frequently clash over what the law dictates, with developers increasingly demanding concessions and waivers that cities do not feel they should have to grant under the law.

Unfortunately, there is little guidance from the courts, as only a handful of published appellate court decisions have examined the Density Bonus Law since its adoption in 1979. In particular, the courts have not yet addressed in any detail how much discretion a city retains to condition or deny a proposed project that otherwise qualifies under the Density Bonus Law. As with any exercise of police power, local development requirements cannot be imposed in a manner that conflicts with state statutes. However, the application of this limitation to specific projects is often disputed.

A few key cases, however, have provided limited insight into the application of the Density Bonus Law to promote development and the corresponding limitations imposed upon cities. Most recently, the court in Walliner v. City of Berkeley (“Walliner II”) provided some guidance concerning the scope of the statute and underscored the courts’ growing reluctance to constrain cities’ ability to use the Density Bonus Law to promote the development of affordable housing units. However, even the Walliner II decision leaves questions unanswered.

The Density Bonus Law has the potential to provide developers of multifamily housing projects considerable leverage during the entitlement process. The awkwardness of the statute and the uncertainty of its application sometimes dissuade developers (and practitioners) from utilizing its provisions. Indeed, many cities exhibit an inherent distrust of the statute or are uncertain about what it actually requires a city to do. This article explores some of these practical and political realities, while positing that the Density Bonus Law is an often-neglected device that developers should consider using more frequently in this challenging real estate market.

II. BACKGROUND

The Density Bonus Law is one of several California statutes designed to implement “an important state policy to promote the construction of low-income housing and to remove impediments to the same.” As summarized in Walliner II, the Density Bonus Law “is a powerful tool for enabling developers to include very low, low, and moderate-income housing units in their new developments.” The purpose of the Density Bonus Law is to encourage cities to offer bonuses and incentives to housing developers that will “contribute significantly to the economic feasibility of lower income housing in proposed housing developments.” As recognized by California courts, “the Density Bonus Law ‘reward[s] a developer who agrees to build a certain percentage of low-income housing with the opportunity to build more residences than would otherwise be permitted by the applicable local regulations.’” By incentivizing developers, the Density Bonus Law promotes the construction of housing for seniors and low-income families.

When the Legislature adopted the Density Bonus Law, it declared that a housing shortage crisis must be addressed and that the State should rely on local governments to provide the necessary increased housing stock “provided, that such local discretion and powers not be exercised in a manner to frustrate the purposes of this act.” The author of a successful 2002 amendment to the statute noted that “too many local governments have undercut [the Density Bonus Law] by layering density bonus and second unit projects with unnecessary and procedural obstacles.” According to the author and sponsors of the 2002 amendment bill, its purpose was to simplify the process for obtaining density bonuses “in order to increase California’s supply of affordable housing.”

The Density Bonus Law applies to both general law and charter cities. It requires cities to adopt an ordinance that specifies how local compliance with the statute will be implemented, though failure to adopt such an ordinance does not relieve the city from complying with the law.

III. DENSITY BONUS LAW MECHANICS

A. Density Bonuses

1. Density Bonus Thresholds

A housing project must first meet certain thresholds of affordability in order to qualify for a density bonus. As
Section 65915 mandates that local governments provide a density bonus when a developer agrees to construct any of the following: (1) 10 percent of the total units within the project for lower income households; (2) 5 percent of total units for very low income households; (3) a senior citizen housing development or mobile home park restricted to older persons, each as defined by separate statute; or (4) 10 percent of units in a common interest development for moderate-income families or persons. Section 65915(b)(1) of the Density Bonus Law provides that requests for a density bonus and incentives must be granted "when an applicant for a housing development seeks and agrees to construct a housing development" that meets one or more of the statute's thresholds. Although a city may eventually deny a request for an incentive if certain limited findings are made, the Density Bonus Law does not identify any findings that would allow a city to deny a density bonus request.

Some have argued that the "seeks and agrees" phrase in the Density Bonus law limits its application to housing developments that are not otherwise required to provide affordable units under an inclusionary zoning ordinance. Indeed, this issue was the subject of a 2005 debate in the legislature concerning the intent of SB 1818 and SB 435, which were proposed amendments to the Density Bonus Law. If that interpretation were followed, however, cities could thwart the Density Bonus Law by imposing inclusionary zoning requirements at or above the qualifying thresholds in the Density Bonus Law, thereby preventing any project from qualifying for a density bonus. Despite these uncertainties with the Density Bonus Law, it is clear that cities cannot impose thresholds higher than those provided under the Density Bonus Law for a project to qualify for a density bonus. In Friends of Lagoon Valley v. City of Vacaville, the city's density bonus ordinance contained thresholds similar to those set forth in an earlier version of the Density Bonus Law. "However, once the Legislature amended Section 65915 to impose lower thresholds, state law preempted inconsistent provisions in these municipal ordinances." Therefore, as a matter of practice, applicants should compare any local density bonus thresholds to those set forth in Section 65915(b) to ensure that the city is applying the correct figures.

2. Density Bonus Calculations

Once a project meets one of the minimum thresholds, the size of the density bonus is governed by the number of affordable units the project will provide. "In its specifics, section 65915 establishes a progressive scale in which the density bonus percentage available to an applicant increases based on the nature of the applicant's offer of below-market rate housing." By linking the size of the density bonus to the number of affordable units offered by the developer, the statute promotes the voluntary production of more affordable housing. "The progressive level of benefits for deeper affordability is the mechanism by which municipalities entice developers to build low-income housing." Proposed projects receiving a minimum of 10% of total units for moderate-income households receive a 5% density bonus, with every additional percentage point increase in applicable units above the minimum (up to 40%) receiving a 1% increase in the density bonus, up to a maximum 35% bonus. Developers agreeing to construct a minimum of 10% of units for low-income households are eligible for a 20% density bonus, and the multiplier for each additional increase in units above the minimum amount (up to 20%) is 1.5%. A similar scale applies to construction of very low-income units, except the minimum 20% density bonus kicks in when only 5% of units are reserved for this classification, and the multiplier for each additional percent increase in units above the minimum amount (up to 11%) is 2.5%. Finally, for a senior housing development or age-restricted mobile home park, the density bonus is 20% of the number of senior housing units. The total number of units for the purpose of calculating the percentages described above does not include units added by a density bonus awarded under the Density Bonus Law or any local law granting a greater density bonus. If permitted by local ordinance, nothing prohibits cities from granting a density bonus greater than what is described in the Density Bonus Law.

B. Incentives and Concessions

1. Defined

Applicants for density bonuses may also request specific incentives or concessions from cities. Thus, when an applicant seeks a density bonus for a housing development that includes the required percentage of affordable housing, section 65915 requires that the city not only grant the density bonus, but provide additional incentives or concessions where needed based on the percentage of low income housing units. A "concession or incentive" (together, "incentive") as the statute does not distinguish the terms includes:

- a reduction in site development standards, or a modification of zoning code or architectural design requirements, including reductions in otherwise mandated setbacks, square footage, and parking ratio requirements, resulting in identifiable, financially sufficient, and actual cost reductions;
- approval of mixed-use zoning in conjunction with the housing project if the nonresidential land uses would reduce the cost of the housing development and are compatible with the housing project and the surrounding area;
- other regulatory incentives proposed by the developer or city that result in identifiable, financially sufficient, and actual cost reductions.

The legislative history indicates that the "identifiable, financially sufficient, and actual cost reductions" text in the incentive definitions was added to protect the developer from a city's attempt to force a developer to accept marginal incentives. The intent of the Density Bonus Law is to ensure that incentives offered by the city "contribute significantly" to the development of affordable housing and, therefore, unless the developer expressly agrees otherwise, "a locality shall not offer a
density bonus or any other incentive that would undermine the intent of the Density Bonus Law.39

The "incentive" definition does not limit or require the provision of direct financial incentives by a city.40 Some commentators believe that an incentive also includes designating the development as "by right," and exemptions from any local ordinances that would indirectly increase the cost of the housing units to be developed.41

2. Calculations

As with density bonus calculations, the number of incentives to which a developer is entitled depends upon the percentage of very low, low, or moderate-income units provided (no incentive is provided for the provision of non-income restricted senior units). The developer must receive the following number of incentives:

- One incentive for projects that include at least 10% of the total units for low-income, at least 5% for very low income, or at least 10% for moderate-income households.42
- Two incentives for projects that include at least 20% of the total units for low-income, at least 10% for very low income, or at least 20% for moderate-income households.
- Three incentives for projects that include at least 30% of the total units for low-income, at least 15% for very low income, or at least 30% for moderate-income households.43

In addition, an applicant may request that the city not require a vehicular parking ratio for a density bonus project that exceeds the following: 1 onsite space for 0-1 bedroom; 2 onsite spaces for 2-3 bedrooms; and 2.5 onsite spaces for four or more bedrooms.44 An applicant may request parking incentives beyond those expressly set forth in the Density Bonus Law.45

3. Required Findings for Denial of an Incentive Request

A city must establish local procedures, approved by the city council, for complying with incentive provisions of the Density Bonus Law.46 Even if local procedures are not established, a city must grant the incentive requested by the applicant unless the city makes a written finding, based upon substantial evidence,47 that the incentive:
- is not required in order to provide for affordable housing costs;
- would have a "specific adverse impact... upon public health and safety or the physical environment" that cannot be feasibly mitigated without rendering the development unaffordable to low- and moderate-income households; or
- would be contrary to state or federal law.48

The statute does not provide guidance on how a city should demonstrate that the incentive is not required in order "to provide for affordable housing costs." A 2002 amendment to the Density Bonus Law generated opposition from local government advocates who argued that this provision would require cities to prepare separate project feasibility analyses in order to refuse an incentive request.49 Even though there is no generally accepted methodology to date, one potential approach is to subtract the mandated lower sales price for the affordable unit from the actual cost to build the unit, and then to compare that developer cost to the financial benefit created by the incentive. Local attempts to restrict the developer's profit margin by denying an incentive request under the first criterion, however, are suspect and may be considered hostile to the Density Bonus Law.50

The second finding expressly borrows the definition of a "specific adverse impact" from the Housing Accountability Act,51 specifically, "a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete."52 This finding is narrower than the local standards used to deny use permit applications, which often invoke broader "general welfare" considerations. "Moreover, mere inconsistency with the zoning ordinance or general plan land use designation shall not constitute a specific adverse impact upon the public health or safety."53

The third finding is self-explanatory, although as discussed below,54 issues may arise if a city attempts to rely on other development-related statutes such as the California Environmental Quality Act, the Subdivision Map Act, or other provisions of the Planning and Zoning Law to provide justification for denying an incentive.

To add some teeth to a city's application of these findings, the Density Bonus Law mandates that a court award the successful plaintiff reasonable attorney's fees and costs if a city refused to grant a requested incentive and the court later determines that the refusal lacks the requisite written findings and evidence.55

C. DEVELOPMENT STANDARD WAIVERS

In addition to, and separate from, requests for incentives, a density bonus applicant may request a waiver or reduction of development standards that would have the effect of physically precluding the construction of the project at the densities or with the incentives permitted under the statute.56 "Development standard" means a site or construction condition, including, without limitation, local height, setback, floor area ratio, onsite open space, and parking area ratio requirements that would otherwise apply to residential development under local ordinances, general plan elements, specific plans, charts, or other local condition, law, policy, resolution, or regulation.57

A request for a development standard waiver neither reduces nor increases the number of incentives to which the developer is otherwise entitled.58 Furthermore, there is no limit on the number of waivers that may be issued.

As with incentives, although a city might ask a developer to modify a requested development standard waiver, it cannot force the developer to do so. Instead, a city's refusal to waive or reduce development standards must be supported by one or more findings similar to those available for denying a request for an incentive.59 Again, if a court determines that such refusal was unwarranted, it must award the developer attorney's fees and costs of suit.60

Importantly, even if the developer does not submit a request for a development standard waiver, a city is prohibited from
IV. RELATIONSHIP TO THE HOUSING ACCOUNTABILITY ACT

Context for the interplay between the state mandates under the Density Bonus Law and local government discretion is afforded by the Housing Accountability Act for guidance, which similarly promotes the development of affordable housing (and housing generally).

The Housing Accountability Act implements the state policy "that a local government not reject or make infeasible housing developments" that contribute to meeting the state's housing need "without a thorough analysis of the economic, social and environmental effects of the action and without complying with subdivision (d)." Courts have clarified that subdivision (d) of the Housing Accountability Act imposes strict limitations on a city's ability to disapprove or conditionally approve certain low-income housing projects. While subdivision (j) applies to housing development projects generally. Both subdivisions apply to affordable housing developments.

Under subdivision (d), a city cannot disapprove or conditionally approve an affordable housing project in a manner that renders it infeasible (including through the use of design review standards) unless it makes one of five written findings based on substantial evidence in the record. One of those findings is that the development project would have a "specific, adverse impact upon the public health or safety," which is similar to the finding for denying an incentive request under the Density Bonus Law, although the latter includes consideration of impacts to the "physical environment." An affordable housing project under subdivision (d), however, differs slightly from a project that may qualify for a density bonus because the former requires that at least 20% of the units be sold or rented to "lower-income households" or 100% of the units be sold or rented to "moderate-income households." Therefore, a project that may qualify for a density bonus by providing only 10% of its units for lower-income households may not qualify for the protections under subdivision (d) of the Housing Accountability Act.

Subdivision (j), which is not limited to affordable housing projects but applies to housing development projects generally, provides that if the proposed development project complies with applicable planning and zoning standards and criteria (including design review standards) that are in effect at the time of project application completion, a city cannot disapprove or conditionally approve the project with a lower density unless it makes written findings supported by substantial evidence in the record that the proposed project would have a "specific, adverse impact on the public health or safety" and that there is no feasible mitigation. Notably, this limitation on a local agency's discretion is similar to the Density Bonus Law's restrictions for denying an incentive request or a proposed waiver or reduction of development standards. Section 65589.5(i) of the Housing Accountability Act thus imposes mandatory conditions limiting cities' discretion to deny the permit, and "does so by setting forth the only conditions under which an application may be disapproved." In addition, the Act places the burden of proof on cities if its project disapproval or conditional approval is challenged in court.

V. CITY DISCRETION TO TAKE ACTIONS NECESSARY TO EFFECTUATE THE DENSITY BONUS LAW

Keeping the above framework in mind and understanding the interplay between the various requirements will help to understand the 2011 appellate decision in Wollmer II.

Wollmer II continued the trend begun by Friends of Lagoon Valley and Wollmer I in 2007 and 2009, respectively, in which the courts deferred to a city's decisions promoting the supply of affordable housing. The key facts in Wollmer II involved the City of Berkeley's ("City") approval of a use permit to construct a five-story, mixed-use building with 98 residential units (78 base units plus 24 bonus units), including 15 affordable units, commercial space, and parking. In addition to a 20.36% density bonus, the City granted the developer's request for development standard waivers applicable to building height, number of stories, and setbacks. Project opponent Wollmer sued, but the trial court denied his petition for writ of administrative mandate and entered judgment in favor of the City.

On appeal, Wollmer raised three density bonus related arguments (in addition to unsuccessful CEQA-based arguments): (1) condition 68 of the use permit allowed the Developers to receive Section 8 subsidies for density-bonus-qualifying units, thereby exceeding the maximum "affordable rent" established in Health and Safety Code section 50053; (2) the City's approval of amenities should not have been considered when deciding what standards should be waived to accommodate the project; and (3) the City improperly calculated the project's density bonus.

The court of appeal rejected all three arguments.

Wollmer first argued that the total amount of rent the developer would receive from very low income tenants qualifying for Section 8 subsidies would exceed the "affordable rent" allowed under the Density Bonus Law because the additional federal subsidies would exceed the statutory amount. In determining the merits of this argument, the court concluded: "Under this reasoning, the density bonus law caps the total rent a housing provider can receive from any source to the above amount, whether that rent comes from direct tenant payment or a combination of tenant contributions and a Section 8 subsidy. This is not the law." The court continued, "affordable rent" within the meaning of our density bonus law is concerned with the rent that a tenant pays, not with the compensation received by the housing provider. It would be nonsensical to equate the notion of setting of "an affordable rent" with that of setting and capping the developer's compensation. Finally, "imposing 'caps' on a developer attempting to build affordable units is hostile to the letter and spirit of the density bonus law.

Next, Wollmer argued that by granting a development standard waiver, the City violated the Density Bonus Law because it was granted to accommodate certain project amenities, including an on-site courtyard, a community plaza, and higher ceilings. The appellate court again rejected this argument.
holding that "nothing in the statute requires the applicant to strip the project of amenities. . . . Standards may be waived that physically preclude construction of a housing development meeting the requirements for a density bonus, period." The court's reasoning suggests that a city may not micromanage the design of a project. If the project meets the requirements of the Density Bonus Law, the city must grant development standard waiver requests to ensure the project is designed as intended and is not physically prevented from being developed. Quoting the prohibition contained in section 65915(d)(1), the Wollner II court warned, as it did in Wollner I: "Had the City failed to grant the waiver and variances, such action would have had the effect of physically precluding the construction of a development meeting the criteria of the density bonus law." Third, Wollmer argued that the City's calculation of the density bonus was improper because the City relied on the densities set forth in its zoning ordinance instead of its general plan. In rejecting Wollmer's third argument, the court explained that the City does not apply the general plan density standards to specific parcels, and found that the City properly calculated the density bonus based on the more specific provisions of its zoning code.

The Wollner II decision reaffirms cities' ability to apply broadly the Density Bonus Law to promote its goals through the award of density bonuses and incentives, and by providing flexibility in granting development standard waivers.

VI. LIMITS ON ABILITY TO CONDITION OR DENY A QUALIFIED HOUSING DEVELOPMENT

What happens, though, if a city wants to deny a density bonus project or impose conditions that make the project infeasible? As explained above, the Housing Accountability Act expressly provides that a city may not take such action against a qualified affordable housing project unless one of that statute's limited findings can be made, and similarly, the Density Bonus Law prohibits a city from denying a request for an incentive or development standard waiver on grounds not identified in that statute.

There is less certainty, however, about whether a city can grant the density bonus, and incentive and waiver requests, then deny the project on other grounds. The Density Bonus Law provides that if a general plan amendment, zoning amendment, or other discretionary approval would not otherwise be required for a proposed project, approval of a density bonus or incentives does not require such approvals. For example, even if an approved density bonus makes the project's density exceed what was otherwise allowed under the applicable general plan land use designation and zoning district, the applicant would not be required to seek amendments of those local regulations.

There may be situations, however, where a project may nonetheless require discretionary approvals not directly related to the density bonus or incentives. In such cases, some cities may argue that the Density Bonus Law does not affect their ability to deny or condition a project under their broader police powers. A city or county may make and enforce within its limits all local, police, sanitary, and other ordinances and regulations not in conflict with general laws. This constitutional authority given to cities to adopt local ordinances is derived from the "inherent reserved power of the state to subject individual rights to reasonable regulation for the general welfare." A city's police power "is as broad as that of the state Legislature itself." For example, local regulations based on aesthetics are permissible so long as they are reasonably related to the general welfare. Even though the police power is broad, it must not "conflict with the general laws." A local regulation conflicts with the "general laws," including statutes such as the Density Bonus Law, if it "is duplicative, contradicts or enters an area fully occupied by general law, either expressly or by legislative implication." It is important to consider this issue in its historical context. Throughout the Density Bonus Law's development, the Legislature declared that affordable housing was critical to California and that cities should not create obstacles to developing affordable housing. This mandate is not limited to the Density Bonus Law, but is also embodied in other statutes, many of which are identified in Government Code section 65582.1. This legislative directive has been accepted by the courts, which have held that the Density Bonus Law should be fully implemented to encourage the creation of more affordable units. Therefore, the Legislature and the courts recognize that more affordable housing is badly needed in California, and local agencies should not impose roadblocks to thwart such development unless they can make one of the statutory findings.

For example, in Building Industry Association v. City of Oceanside, the court held that a local ballot measure facially conflicted with, and was preempted by, the Density Bonus Law when it impeded the Density Bonus Law's promotion of construction of low-income housing. Similarly, in Friends of Lagoon Valley, the court examined the Density Bonus Law and its relationship to the city's police powers, and held that a local ordinance's imposition of a higher threshold for a project to qualify for a density bonus would be preempted by the Density Bonus Law and therefore void. Finally, Wollmer I and Wollmer II suggest that disapproving a density bonus project would invoke the prohibition in the Density Bonus Law against applying development standards that would physically preclude construction of the project.

In Wollmer I, the City of Berkeley approved use permits and variances for a mixed-use density bonus project consisting of residential units and retail commercial space. When the legality of the City's approval was challenged, the appellate court held:

Had the City failed to grant the variances the result would "have the effect of precluding the construction of a development" (§ 65915, subd. (e)), which met the criteria of the Density Bonus Law. If the Project as a whole was not economically feasible, then the below market rate housing units would not be built, and the purpose of the Density Bonus Law to encourage the development of law and moderate income housing would not be achieved. A similar conclusion was reached in Wollmer II regarding the City's consideration of the project's use permit application. Thus, both Wollmer courts have warned that denial of a use permit or variance might be contrary to the Density Bonus Law, specifically, section 65582.1. This judicial language implies that if a city
disapproves a density bonus project’s application for a use permit, variance, design review, or similar permit, and the city cannot make any of the findings set forth in the Density Bonus Law to justify the disapproval, then the action would be contrary to the purpose of the Density Bonus Law and vulnerable to a writ of mandate issued by the courts, including attorney’s fees and costs.

To interpret the law otherwise would allow a city to undermine the purpose of the Density Bonus Law by restricting the project to a discretionary approval process such as a conditional use permit, then disapproving the project based on broad “general welfare” concerns or similar grounds. Even though such an adjudicatory action would be subject to the standard of review in Code of Civil Procedure section 1094.5, which is a less deferential standard than is typical for legislative actions, it is far easier to meet than the “specific adverse impact” standard provided in the Density Bonus Law. Denying density bonus projects or rendering them infeasible through excessive conditions would mean “that housing units for lower-income households would not be built and the purpose of the density bonus law to encourage such development would not be achieved.”

As a practical note, an applicant should consider formally requesting an incentive or development standard waiver that addresses potential grounds for denial (or excessive conditions of approval). This will invoke the restrictions on denial set forth in subdivisions (d)(3) and (e)(1) of the Density Bonus Law, thereby preserving the opportunity to recover attorney’s fees if a subsequent lawsuit is successful.

**VII. POLITICAL REALITIES**

Although many cities struggle to meet their fair share of their respective regional housing need, particularly the provision of affordable housing units, developers often encounter local resistance when proposing density bonus projects that would help remedy this shortfall. Indeed, affordable multifamily projects are regularly opposed by neighborhood groups. (These groups often include citizens who identify themselves with “anti-sprawl” and “smart growth” policies—an irony not lost on the development community.) Project opposition in California’s urban centers is often highly-educated and organized, and exerts significant influence on city staff and elected officials. As a result, density bonus projects regularly confront strong third-party opposition and enthused local officials.

A related political consideration is the resistance that developers encounter when city staff and elected officials perceive a development project is forced upon them. If a city believes that a developer is using the Density Bonus Law as a hammer without considering the effect of the project on the community, the city might resist the project with the tools it has available. Given this potential agency reaction, a developer should consider spending time with city staff and officials to discuss not only how the Density Bonus Law affects the project, but also how the project positively affects the city (e.g., by helping attain regional housing requirements, and promoting transit-oriented and sustainable development policies). A mutual understanding of the applicable legal environment and the impact of the project on the community should be viewed as a means for advancing the dialogue between the developer and the city, and need not be characterized as a confrontation.

The reality, however, is that even if the statute limits a city’s discretion to condition or deny a density bonus project, a city may decide to do so anyway due to neighborhood pressure or as a reaction to perceived strong-arming by the developer. A developer then must decide whether to seek judicial relief, which many are reluctant to do despite the potential to recover attorney’s fees and costs, especially if the developer fears repercussions on future projects within that jurisdiction.

Because key elements of the Density Bonus Law are still subject to various interpretations that have not been clarified by the Legislature, it will likely be the courts that provide guidance to both developers and cities on future projects.

**VIII. CONCLUSION**

The Density Bonus Law is a potentially powerful tool for developers of multifamily projects. Although the Density Bonus Law has existed for over thirty years, both developers and cities have struggled with its application. The statute “is confusing, convoluted, and subject to endless debate about its requirements.” As a result, many developers are either unaware of the law or unsure about how it works. Many cities share this unfamiliarity and are resistant to attempts to limit their political powers when considering multifamily development applications. The current residential real estate market has begun to sharpen the focus of developers, cities, and practitioners with regard to this statute, and all parties should expect the Density Bonus Law to become a more integral component of the local multifamily housing projects entitlement process.

Maximizing Density Through Affordability

A Developer's Guide to the California Density Bonus Law

By Jon E. Goetz and Tom Sakai

Savvy housing developers are taking advantage of California's Density Bonus Law, a mechanism which allows them to obtain more favorable local development requirements in exchange for offering to build affordable or senior units. The Density Bonus Law (found in California Government Code Sections 65915 – 65918) provides developers with powerful tools to encourage the development of affordable and senior housing, including up to a 35% increase in project densities, depending on the amount of affordable housing provided. The Density Bonus Law is about more than the density bonus itself, however. It is actually a larger package of incentives intended to help make the development of affordable and senior housing economically feasible. Other tools include reduced parking requirements, other incentives and concessions such as reduced setback and minimum square footage requirements, and the ability to donate land for the development of affordable housing to earn a density bonus. Often these other tools are even more helpful to project economics than the density bonus itself, particularly the special parking benefits. Sometimes these incentives are sufficient to make the project pencil out, but for other projects financial assistance is necessary to make the project feasible.

In determining whether a development project would benefit from becoming a density bonus project, developers also need to be aware that:

- The Density Bonus is a state mandate. A developer who meets the requirements of the state law is entitled to receive the density
bonus and other benefits. As with any state mandate, some local governments will resent the state requirement and will attempt to resist. But many local governments like the density bonus as a helpful tool to cut through their own land use requirements and local political issues.

- Use of a density bonus may be particularly helpful in those jurisdictions that impose inclusionary housing requirements for new developments.

How the Density Bonus Works

Projects Entitled to a Density Bonus

Cities and counties are required to grant a density bonus and other incentives or concessions to housing projects which contain one of the following:

- At least 5% of the housing units are restricted to very low income residents.
- At least 10% of the housing units are restricted to lower income residents.
- At least 10% of the housing units in a for-sale common interest development are restricted to moderate income residents.
- The project donates at least one acre of land to the city or county for very low income units, and the land has the appropriate general plan designation, zoning, permits and approvals, and access to public facilities needed for such housing.
- The project is a senior citizen housing development (no affordable units required).
- The project is a mobilehome park age-restricted to senior citizens (no affordable units required).

Density Bonus Amount

The amount of the density bonus is set on a sliding scale, based upon the percentage of affordable units at each income level, as shown in the chart on the following page.

* All density bonus calculations resulting in fractions are rounded up to the next whole number.
** Affordable unit percentage is calculated excluding units added by a density bonus.
*** No affordable units are required for senior housing units to receive a density bonus.
Required Incentives and Concessions

In addition to the density bonus, the city or county is also required to provide one or more “incentives” or “concessions” to each project which qualifies for a density bonus (except that market rate senior citizen projects with no affordable units, and land donated for very low income housing, do not appear to be entitled to incentives or concessions). A concession or incentive is defined as:

- A reduction in site development standards or a modification of zoning code or architectural design requirements, such as a reduction in setback or minimum square footage requirements; or
- Approval of mixed use zoning, or
- Other regulatory incentives or concessions which actually result in identifiable and financially sufficient cost reductions.

The number of required incentives or concessions is based on the percentage of affordable units in the project:

- For projects with at least 5% very low income, 10% lower income or 10% moderate income units, one incentive or concession is required.
- For projects with at least 10% very low income, 20% lower income or 20% moderate income units, two incentives or concessions are required.
- For projects with at least 15% very low income, 30% lower income or 30% moderate income units, three incentives or concessions are required.

The city or county is required to grant the concession or incentive proposed by the developer unless it finds that the proposed concession or incentive is not required in order to achieve the required affordable housing costs or rents, or would cause a public health or safety problem, cause an environmental problem, harm historical property, or would be contrary to law. Financial incentives, fee waivers and reductions in dedication requirements may be, but are not required to be, provided by the city or county.

Other Forms of Assistance

A development qualifying for a density bonus also receives two additional forms of assistance which have important benefits for a housing project:

- **Waiver or Reduction of Development Standards.** If any other city or county development standard would physically prevent the project from being built at the permitted density and with the granted concessions/incentives, the developer may propose to have those standards waived or reduced. The city or county is not permitted to apply any development standard which physically precludes the construction of the project at its permitted density and with the granted concessions/incentives. The city or county is not required to waive or reduce development standards that would cause

“**This ability to force the locality to modify its normal development standards is sometimes the most compelling reason for the developer to structure a project to qualify for the density bonus.**”

...
**Maximum Parking Requirements.** Upon the developer’s request, the city or county may not require more than one onsite parking space for studio and one bedroom units, two onsite parking spaces for two and three bedroom units, and two and one-half onsite parking spaces for units with four or more bedrooms. Onsite spaces may be provided through tandem or uncovered parking, but not onstreet parking. Requesting these parking standards does not count as an incentive or concession, but the developer may request further parking standard reductions as an incentive or concession. This is one of the most important benefits of the density bonus statute. In many cases, achieving a reduction in parking requirements may be more valuable than the additional permitted units. In higher density developments requiring the use of structured parking, the construction cost of structured parking is very expensive, costing upwards of $20,000 per parking space. While this provision of the density bonus statute can be used to reduce excessive parking requirements, care must be taken not to impact the project’s marketability by reducing parking to minimum requirements which lead to parking shortages.

**Affordable Housing Restrictions.**

- **Rental Units.** Affordable rental units must be restricted by an agreement which sets maximum incomes and rents for those units. The income and rent restrictions must remain in place for a 30-year term, or a longer period if required by the terms of other subsidies received by the project. Rents must be restricted as follows:

  - For very low income units, rents may not exceed 30% x 50% of the area median income for a household size suitable for the unit.
  - For lower income units, rents may not exceed 30% x 60% of the area median income for a household size suitable for the unit.
  - Area median income is determined annually by regulation of the California Department of Housing and Community Development, based upon median income regulations adopted by the U.S. Department of Housing and Urban Development.
  - Rents must include a reasonable utility allowance.
  - Household size appropriate to the unit means 1 for a studio unit, 2 for a one
**For Sale Units.** Affordable for sale units must be sold to the initial buyer at an affordable housing cost. All housing related costs generally may not exceed 35% x 110% of the area median income for a household size suitable for the unit. Housing related costs include mortgage loan payments, mortgage insurance payments, property taxes and assessments, homeowner association fees, reasonable utilities allowance, insurance premiums, maintenance costs, and space rent.

- Buyers must enter into an equity sharing agreement with the city or county, unless the equity sharing requirements conflict with the requirements of another public funding source or law. The equity sharing agreement does not restrict the resale price, but requires the original owner to pay the city or county a portion of any appreciation received on resale.

- The city/county percentage of appreciation is the purchase price discount received by the original buyer, plus any down payment assistance provided by the city/county. (For example, if the original sales price is $200,000, and the original fair market value is $250,000, and there is no city/county down payment assistance, the city/county subsidy is $50,000, and the city/county’s share of appreciation is 20%).

- The seller is permitted to retain its original down payment, the value of any improvements made to the home, and the remaining share of the appreciation.

- The income and affordability requirements are not binding on resale purchasers (but if other public funding sources or programs are used, the requirements may apply to resales for a fixed number of years).

- A list of current affordable housing cost calculations and income limits for many California counties is available at the Kronick Moskovitz Tiedemann & Girard website at [www.kmtg.com/publications](http://www.kmtg.com/publications).

---

**How the Density Bonus Works for Senior Projects**

As shown in the Density Bonus Chart above, a senior citizen housing development meeting the requirements of Section 51.3 or 51.12 of the Civil Code qualifies for a 20% density bonus. This is a very desirable option for senior housing developments. In jurisdictions where the local ordinances do not reduce the parking requirements for senior housing developments, the reduced parking requirements alone may justify applying for a density bonus.

"In jurisdictions where the local ordinances do not reduce the parking requirements for senior housing developments, the reduced parking requirements alone may justify applying for a density bonus."

---

**How the Density Bonus Works for Condominium Conversion Projects**

The density bonus statute provides for a density bonus of up to 25% for condominium conversion projects providing at least 33% for the total units to low or moderate income households or 15% of the units to lower income households. Many condominium conversion projects are not designed in a manner that allows them to take advantage of the opportunity to construct additional units, but some projects may find this helpful. While condominium conversions are not presently a viable development alternative, this provision may be of some value in limited situations in the future.
How the Density Bonus Works for Child Care

Housing projects that provide child care are eligible for a separate density bonus equal to the size of the child care facility. The child care facility must remain in operation for at least the length of the affordability covenants. A percentage of the child care spaces must also be made available to low and moderate income families. A separate statute permits cities and counties to grant density bonuses to commercial and industrial projects of at least 50,000 square feet, when the developer sets aside at least 2,000 square feet in the building and 3,000 square feet of outside space for a child care facility. See Government Code Section 55917.5 for additional details.

How to Obtain a Density Bonus Through Land Donation

Many market rate housing developers are uncomfortable with building and marketing affordable units themselves, whether due to their lack of experience with the affordable housing process or because of their desire to concentrate on their core market rate homes. Other developers may have sites that are underutilized in terms of project density. The density bonus law contains a special sliding scale bonus for land donation which allows those developers to turn over the actual development of the affordable units to local agencies or experienced low income developers. The density bonus is available for the donation of at least an acre of fully entitled land, with all needed public facilities and infrastructure, and large enough for the construction of a high density very low income project containing 10% of the total homes in the development. The parcel must be located within the boundary of the proposed development or, subject to the approval of the jurisdiction, and within one-fourth mile of the boundary of the proposed development. The more units that can be built on the donated land, the larger the density bonus. Because of the parcel size requirements, this option is only practical for larger developments. The land donation density bonus can be combined with the regular density bonus provided for the development of affordable units, up to a maximum 35% density bonus. A master planned community developer needs to carefully evaluate the land donation option as opposed to engaging an affordable housing developer to fulfill the project’s affordable housing obligations. In many cases the master developer
KMTG REFERENCE GUIDE

will prefer to control the affordable component of the project through a direct agreement with the affordable housing developer, rather than allowing the local government to control the project.

How the Density Bonus Can Help in a Friendly Jurisdiction

While the density bonus law is often used by developers to obtain more housing than the local jurisdiction would ordinarily permit, it can also be a helpful land use tool in jurisdictions which favor the proposed project and want to provide support. Planners in many cities and counties may be disposed by personal ideology or local policy to encourage the construction of higher density housing and mixed use developments near transit stops and downtown areas, but are hampered by existing general plan standards and zoning from approving these sorts of projects. Elected officials often support these projects too, but may find it politically difficult to oppose neighborhood and environmental groups over the necessary general plan amendments, zoning changes and CEQA approvals.

The density bonus can provide a useful mechanism for increasing allowable density without requiring local officials to approve general plan amendments and zoning changes. The density bonus can provide a useful mechanism for increasing allowable density without requiring local officials to approve general plan amendments and zoning changes. A project that satisfies the requirements of the density bonus law often can obtain the necessary land use approvals through the award of the density bonus units and requested concessions and incentives, without having to amend the underlying land use requirements. Friendly local officials may encourage the use of the density bonus to "force" the jurisdiction to approve a desired project.

How the Density Bonus Law Can Help in a Hostile Jurisdiction

It is important to know that the density bonus is a state law requirement which is mandatory on cities and counties, even charter cities which are free from many other state requirements. A developer who meets the law's requirements for affordable or senior units is entitled to the density bonus and other assistance as of right, regardless of what the locality wants (subject to limited health and safety exceptions). The density bonus statute can be used to achieve reductions in development standards or the granting of concessions or incentives from jurisdictions that otherwise would not be inclined to grant those items. Examples might include a reduction in parking standards if those standards are deemed excessive by the developer, or other reductions in development standards if needed to achieve the total density permitted by the density bonus.

Developers who nonetheless encounter hostility from local jurisdictions are provided several tools to ensure that a required density bonus is actually granted. Developers are entitled to an informal meeting with a local jurisdiction which fails to modify a requested development standard. If a developer successfully sues the locality to enforce the density bonus requirements, it is entitled to an award of its attorneys' fees. The obligation to pay a developer's attorneys' fees is a powerful incentive for local jurisdictions to voluntarily comply with the state.

"The density bonus can provide a useful mechanism for increasing allowable density without requiring local officials to approve general plan amendments and zoning changes."

"A developer who meets the law's requirements for affordable or senior units is entitled to the density bonus and other assistance as of right, regardless of what the locality wants."
CEQA Issues in Density Bonus Projects

Although there is no specific density bonus exemption from the California Environmental Quality Act, many density bonus projects are likely candidates for urban infill and affordable housing exemptions from CEQA. One commonly invoked exemption is the Class 32 urban infill exemption found in CEQA Guidelines Section 15332. That exemption is available if the project is consistent with applicable general plan designation and zoning, the site is five acres or less and surrounded by urban uses, is not habitat for endangered, rare or threatened species, does not have any significant effects relating to traffic, noise, air quality or water quality, and is adequately served by utilities and public services. Other exemptions are available for high density housing projects near major transit stops (CEQA Guidelines Section 15155) and affordable housing projects of up to 100 units (CEQA Guidelines Section 15194).

A recent case, Wolfram v. City of Berkeley, clarified the use of the CEQA infill exemption for density bonus projects. In that case, an opponent of a Berkeley density bonus project challenged the City's use of the urban infill exemption on the grounds that the City's modifications and waivers of development standards, as required under the density bonus law, meant that the project was not consistent with existing zoning. The court rejected that argument, finding that the modifications required by the density bonus law did not disqualify the project from claiming the exemption.

Not all density bonus projects will qualify for one of these CEQA exemptions, however. Sometimes the additional density provided to non-exempt projects may bring the project out of the coverage of an existing CEQA approval for a general plan, specific plan or other larger project. For instance, if a previously approved environmental impact report analyzed a 100 unit project as the largest allowed under existing zoning, but the developer is able to qualify for 120 units with a density bonus, the existing EIR may not cover the larger project. The larger density bonus project may require additional CEQA analysis for approval.

Using the Density Bonus to Satisfy Inclusionary Housing Requirements

Many of California's cities and counties have adopted inclusionary housing ordinances, which typically require that a specified percentage of units in a new housing development be restricted as affordable units. The inclusionary requirements significantly reduce income from rental units and sales prices of for-sale homes. In today's tight housing market, compliance with local inclusionary requirements may make many projects economically infeasible. The density bonus provides one method for developers to improve the economics of their project while still complying with the inclusionary...
housing requirements. While there are some local agencies which believe that inclusionary units do not qualify for density bonuses, it is generally understood that the density bonus is intended by state law to be a powerful financial tool to help developers achieve the inclusionary housing requirements.

“\textit{In today's tight housing market, compliance with local inclusionary requirements may make many projects economically infeasible. The density bonus provides one method for developers to improve the economics of their project while still complying with the inclusionary housing requirements.}”

Local inclusionary housing ordinances are currently in a state of uncertainty due to recent case law. One recent case, \textit{Palmer/Sixth Street Properties, L.P. v. City of Los Angeles, 175 Cal. App. 4th 1396} (2009), held that inclusionary housing requirements violate the Costa-Hawkins Act, which allows owners of residential rental housing to establish the initial rental rates for housing units without being subject to government rent limits. However, there are exceptions to the Costa-Hawkins rent control prohibition for developers who receive assistance under the density bonus law or who receive direct financial assistance from a public agency.

Localities with inclusionary housing ordinances may welcome a developer’s use of the density bonus law because this will effectively prevent the developer from challenging the applicability of the inclusionary housing ordinance.

\section*{Density Bonus – A Flexible Tool}

The Density Bonus Law can be a powerful tool for a variety of different types of development projects, whether they are traditional affordable housing projects, predominantly market rate housing developments, or senior projects. Obtaining greater density can help the developer of any type of project bring costs and financing sources into line by putting more homes on the land, reducing the per unit land costs. Use of the favorable parking requirements can reduce the amount of costly land needed for parking. The incentives and concessions to be provided by the local government can provide a helpful way to modify development requirements which may stand in the way of a successful project. Of course there is a price to pay for these benefits - the affordable units needed to earn the density bonus. Each developer will need to make a cost-benefit determination whether the cost of compliance is worth the benefits. But the Density Bonus Law is unquestionably a useful option for housing developers trying to make financial sense of their projects in today's economy.

\section*{Density Bonus Statutes}

Please refer to pages 11 through 16.
Density Bonus Statutes

65915. (a) When an applicant seeks a density bonus for a housing development within, or for the donation of land for housing within, the jurisdiction of a city, county, or city and county, that local government shall provide the applicant with incentives or concessions for the production of housing units and child care facilities as prescribed in this section. All cities, counties, or cities and counties shall adopt an ordinance that specifies how compliance with this section will be implemented. Failure to adopt an ordinance shall not relieve a city, county, or city and county from complying with this section.

(b) (1) A city, county, or city and county shall grant one density bonus, the amount of which shall be as specified in subdivision (f), and incentives or concessions, as described in subdivision (d), when an applicant for a housing development seeks and agrees to construct a housing development, excluding any units permitted by the density bonus awarded pursuant to this section, that contain at least any one of the following:

(A) Ten percent of the total units of a housing development for lower income households, as defined in Section 50079.5 of the Health and Safety Code.

(B) Five percent of the total units of a housing development for very low income households, as defined in Section 50105 of the Health and Safety Code.

(C) Assisted senior citizen housing development, as defined in Sections 51.3 and 51.12 of the Civil Code, or mobile home park that limits residency based on age requirements for housing for older persons pursuant to Section 796.76 or 796.5 of the Civil Code.

(D) Ten percent of the total dwelling units in a common interest development as defined in Section 1351 of the Civil Code for persons and families of moderate income, as defined in Section 50055 of the Health and Safety Code, provided that all units in the development are offered to the public for purchase.

(2) For purposes of calculating the amount of the density bonus pursuant to subdivision (b), the applicant who requests a density bonus pursuant to this subdivision shall elect whether the bonus shall be awarded on the basis of subparagraph (A), (B), (C), or (D) of paragraph (1).

(3) For the purposes of this section, "total units" or "total dwelling units" does not include units added by a density bonus awarded pursuant to this section or any local law granting a greater density bonus.

(c) (1) An applicant shall agree to, and the city, county, or city and county shall ensure, continued affordability of all low- and very low income units that qualified the applicant for the award of the density bonus for 30 years or a longer period of time if required by the construction or mortgage financing assistance program, mortgage insurance program, or rental subsidy program. Rents for the lower income density bonus units shall be set at an affordable rent as defined in Section 50053 of the Health and Safety Code. Owner-occupied units shall be available at an affordable housing cost as defined in Section 50052.5 of the Health and Safety Code.

(2) An applicant shall agree to, and the city, county, or city and county shall ensure that, the initial occupant of the moderate-income units that are directly related to the receipt of the density bonus in the common interest development, as defined in Section 1351 of the Civil Code, are persons and families of moderate income, as defined in Section 50053 of the Health and Safety Code, and that the units are offered at an affordable housing cost, as that cost is defined in Section 50052.5 of the Health and Safety Code. The local government shall enforce an equity sharing agreement, unless it is in conflict with the requirements of another public funding source or law. The following apply to the equity sharing agreement:

(A) Upon resale, the seller of the unit shall retain the value of any improvements, the down payment, and the seller’s proportionate share of appreciation. The local government shall recapture any initial subsidy as defined in subparagraph (b), and is proportionate share of appreciation, as defined in subparagraph (C), which amount shall be used within five years for any of the purposes described in subdivision (e) of Section 33334.2 of the Health and Safety Code that promote home ownership.

(B) For purposes of this subdivision, the local government’s initial subsidy shall be equal to the fair market value of the home at the time of initial sale minus the initial sale price to the moderate-income household, plus the amount of any down payment assistance or mortgage assistance. If upon resale the market value is lower than the initial market value, then the value at the time of the resale shall be used as the initial market value.

(C) For purposes of this subdivision, the local government’s proportionate share of appreciation shall be equal to the ratio of the local government’s initial subsidy to the fair market value of the home at the time of initial sale.

(d) (1) An applicant for a density bonus pursuant to subdivision (b) may submit to a city, county, or city and county a proposal for the specific incentives or concessions that the applicant requests pursuant to this section, and may request a meeting with the city, county, or city and county. The city, county, or city and county shall grant the concession or incentive requested by the applicant unless the city, county, or city and county makes a written finding, based upon substantial evidence, of any of the following:

(A) The concession or incentive is not required in order to provide for affordable housing costs, as defined in Section 50052.5 of the Health and Safety Code, or for rents for the targeted units to be set as specified in subdivision (c).

(B) The concession or incentive would have a specific adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65586.5, upon public health and safety or the physical environment or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the
development unaffordable to low- and moderate-income households.

(C) The concession or incentive would be contrary to state or federal law.

(2) The applicant shall receive the following number of incentives or concessions:

(A) One incentive or concession for projects that include at least 10 percent of the total units for lower income households, at least 5 percent for very low income households, or at least 10 percent for persons and families of moderate income in a common interest development.

(B) Two incentives or concessions for projects that include at least 20 percent of the total units for lower income households, at least 10 percent for very low income households, or at least 20 percent for persons and families of moderate income in a common interest development.

(C) Three incentives or concessions for projects that include at least 30 percent of the total units for lower income households, at least 15 percent for very low income households, or at least 30 percent for persons and families of moderate income in a common interest development.

(3) The applicant may initiate judicial proceedings if the city, county, or city and county refuses to grant a requested density bonus, incentive, or concession. If a court finds that the refusal to grant a requested density bonus, incentive, or concession is in violation of this section, the court shall award the plaintiff reasonable attorney’s fees and costs of suit. Nothing in this subdivision shall be interpreted to require a local government to grant an incentive or concession that has a specific adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon health, safety, or the physical environment, and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact. Nothing in this subdivision shall be interpreted to require a local government to grant an incentive or concession that has an adverse impact on any real property that is listed in the California Register of Historical Resources, or to grant any waiver or reduction that would be contrary to state or federal law.

(4) A proposal for the waiver or reduction of development standards pursuant to this subdivision shall neither reduce nor increase the number of incentives or concessions to which the applicant is entitled pursuant to subdivision (c).

(5) For the purposes of this chapter, "density bonus" means a density increase over the otherwise maximum allowable residential density as of the date of application by the applicant to the city, county, or city and county. The amount of density bonus to which the applicant is entitled shall vary according to the amount by which the percentage of affordable housing units exceeds the percentage established in subdivision (b).

(1) For housing developments meeting the criteria of subparagraph (A) of paragraph (1) of subdivision (b), the density bonus shall be calculated as follows:

<table>
<thead>
<tr>
<th>Percentage Low-Income Units</th>
<th>Percentage Density Bonus</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>20</td>
</tr>
<tr>
<td>11</td>
<td>21.5</td>

(2) This increase shall be in addition to any increase in density mandated by subdivision (b), up to a maximum combined mandated density increase of 35 percent if an applicant seeks an increase pursuant to both this subdivision and subdivision (b).

All density calculations resulting in fractional units shall be rounded up to the next whole number. Nothing in this subdivision shall be construed to enlarge or diminish the authority of a city, county, or city and county to require a developer to donate land as a condition of development. An applicant shall be eligible for the increased density bonus described in this subdivision if all of the following conditions are met:

(A) The applicant donates and transfers the land no later than the date of approval of the final subdivision map, parcel map, or residential development application.

(B) The developable acreage and zoning classification of the land being transferred are sufficient to permit construction of units affordable to very low income households in an amount not less than 10 percent of the number of residential units of the proposed development.

(C) The transferred land is at least one acre in size or of sufficient size to permit development of at least 40 units, has the appropriate general plan designation, is appropriately zoned with appropriate development standards for development at the density described in paragraph (3) of subdivision (c) of Section 65538.2, and is or will be served by adequate public facilities and infrastructure.

(D) The transferred land shall have all of the permits and approvals, other than building permits, necessary for the development of the very low income housing units on the transferred land, not later than the date of approval of the final subdivision map, parcel map, or residential development application, except that the local government may subject the proposed development to subsequent design review to the extent authorized by subdivision (g) of Section 65538.2 if the design is not reviewed by the local government prior to the time of transfer.

(E) The transferred land and the affordable units shall be subject to a deed restriction ensuring continued affordability of the units consistent with paragraphs (1) and (2) of subdivision (c), which shall be recorded on the property at the time of the transfer.

(F) The land is transferred to the local agency or to a housing developer approved by the local agency. The local agency may require the applicant to identify and transfer the land to the developer.
(C) The transferred land shall be within the boundary of the proposed development or, if the local agency agrees, within one-quarter mile of the boundary of the proposed development.

(H) A proposed source of funding for the very low income units shall be identified not later than the date of approval of the final subdivision map, parcel map, or residential development application.

(1) When an applicant proposes to construct a housing development that conforms to the requirements of subdivision (b) and includes a child care facility that will be located on the premises of, as part of, or adjacent to the project, the city, county, or city and county shall grant either of the following:

(A) An additional density bonus that is an amount of square feet of residential space that is equal to or greater than the amount of square feet in the child care facility.

(B) An additional concession or incentive that contributes significantly to the economic feasibility of the construction of the child care facility.

(2) The city, county, or city and county shall require, as a condition of approving the housing development, that the following occur:

(A) The child care facility shall remain in operation for a period of time that is as long as or longer than the period of time during which the density bonus units are required to remain affordable pursuant to subdivision (c).

(B) Of the children who attend the child care facility, the children of very low income households, lower income households, or families of moderate income shall equal a percentage that is equal to or greater than the percentage of dwelling units that are required for very low income households, lower income households, or families of moderate income pursuant to subdivision (b).

(C) Notwithstanding any requirement of this subdivision, a city, county, or city and county shall not be required to provide a density bonus or concession for a child care facility if it finds, based upon substantial evidence, that the community does not have adequate child care facilities.

(D) “Child care facility,” as used in this section, means a child day care facility other than a family day care home, including, but not limited to, infant centers, preschools, extended day care facilities, and school age child care centers.

(1) “Housing development,” as used in this section, means a development project for five or more residential units. For the purposes of this section, “housing development” also includes a subdivision or common interest development, as defined in Section 351 of the Civil Code, approved by a city, county, or city and county and consists of residential units or unimproved residential lots and either a project to substantially rehabilitate and convert an existing commercial building to residential use or the substantial rehabilitation of an existing multifamily dwelling, as defined in subdivision (d) of Section 6563.4, where the result of the rehabilitation would be a net increase in available residential units. For the purpose of calculating a density bonus, the residential units shall be on contiguous sites that are the subject of one development application, but do not have to be based upon individual subdivision maps or parcels. The density bonus shall be permitted in geographic areas of the housing development other than the areas where the units for the lower income households are located.

(E) The granting of a concession or incentive shall not be interpreted, in and of itself, to require a general plan amendment, local coastal plan amendment, zoning change, or other discretionary approval. This provision is declaratory of existing law.

(F) For the purposes of this chapter, concession or incentive means any of the following:

(1) A reduction in site development standards or a modification of zoning code requirements or architectural design requirements that exceed the minimum building standards approved by the California Building Standards Commission as provided in Part 2.5 (commencing with Section 18901) of Division 13 of the Health and Safety Code, including, but not limited to, a reduction in setback and square footage requirements and in the ratio of vehicular parking spaces that would otherwise be required that results in identifiable, financially sufficient, and actual cost reductions.

(G) Approval of mixed use zoning in conjunction with the housing project if commercial, office, industrial, or other land uses will reduce the cost of the housing development and if the commercial, office, industrial, or other land uses are compatible with the housing project and the existing or planned development in the area where the proposed housing project will be located.

(H) Other regulatory incentives or concessions proposed by the developer or the city, county, or city and county that result in identifiable, financially sufficient, and actual cost reductions.

(I) Subdivision (k) does not limit or require the provision of direct financial incentives for the housing development, including the provision of publicly owned land, by the city, county, or city and county, or the waiver of fees or dedication requirements.

(J) Nothing in this section shall be construed to supersede or in any way alter or lessen the effect or application of the California Coastal Act (Division 20 (commencing with Section 30000) of the Public Resources Code).

(K) If permitted by local ordinance, nothing in this section shall be construed to prohibit a city, county, or city and county from granting a density bonus greater than what is described in this section for a development that meets the requirements of this section or from granting a proportionally lower density bonus than what is required by this section for developments that do not meet the requirements of this section.

(L) For purposes of this section, the following definitions shall apply:

(1) “Development standard” includes a site or construction condition, including, but not limited to, a height limitation, a setback requirement, a floor area ratio,
an on-site open-space requirement, or a parking ratio that applies to a residential development pursuant to any ordinance, general plan element, specific plan, charter, or other local condition, law, policy, resolution, or regulation.

(2) “Maximum allowable residential density” means the density allowed under the zoning ordinance and land use element of the general plan, or if a range of density is permitted, means the maximum allowable density for the specific zoning range and land use element of the general plan applicable to the project. Where the density allowed under the zoning ordinance is inconsistent with the density allowed under the land use element of the general plan, the general plan density shall prevail.

(p) (1) Upon the request of the developer, no city, county, or city and county shall require a vehicular parking ratio, inclusive of handicapped and guest parking, of a development meeting the criteria of subdivision (b), that exceeds the following ratios:

(A) Zero to one bedroom: one onsite parking space.

(B) Two to three bedrooms: two onsite parking spaces.

(C) Four or more bedrooms: two and one-half parking spaces.

(2) If the total number of parking spaces required for a development is other than a whole number, the number shall be rounded up to the next whole number. For purposes of this subdivision, a development may provide “onsite parking” through tandem parking or uncovered parking, but not through on-street parking.

(3) This subdivision shall apply to a development that meets the requirements of subdivision (b), but only at the request of the applicant. An applicant may request parking incentives or concessions beyond those provided in this subdivision pursuant to subdivision (d).

65915.5. (a) When an applicant for approval to convert apartments to a condominium project agrees to provide at least 33 percent of the total units of the proposed condominium project to persons and families of lower or moderate income as defined in Section 50063 of the Health and Safety Code, or 15 percent of the total units of the proposed condominium project to lower income households as defined in Section 50078.5 of the Health and Safety Code, and agrees to pay for the reasonably necessary administrative costs incurred by a city, county, or city and county pursuant to this section, the city, county, or city and county shall either (1) grant a density bonus or (2) provide other incentives of equivalent financial value. A city, county, or city and county may place such reasonable conditions on the granting of a density bonus or other incentives of equivalent financial value as it finds appropriate, including, but not limited to, conditions which assure continued affordability of units to subsequent purchasers who are persons and families of low and moderate income or lower income households.

(b) For purposes of this section, “density bonus” means an increase in units of 25 percent over the number of apartments, to be provided within the existing structure or structures proposed for conversion.

(c) For purposes of this section, “other incentives of equivalent financial value” shall not be construed to require a city, county, or city and county to provide cash transfer payments or other monetary compensation but may include the reduction or waiver of requirements which the city, county, or city and county might otherwise apply as conditions of conversion approval.

(d) An applicant for approval to convert apartments to a condominium project may submit to a city, county, or city and county a preliminary proposal pursuant to this section prior to the submission of any formal requests for subdivision map approvals. The city, county, or city and county shall, within 60 days of receipt of a written proposal, notify the applicant in writing of the manner in which it will comply with this section. The city, county, or city and county shall establish procedures for carrying out this section, which shall include legislative body approval of the means of compliance with this section.

(e) Nothing in this section shall be construed to require a city, county, or city and county to approve a proposal to convert apartments to condominiums.

(f) An applicant shall be ineligible for a density bonus or other incentives under this section if the apartments proposed for conversion constitute a housing development for which a density bonus or other incentives were provided under Section 65915.

65916. Where there is a direct financial contribution to a housing development pursuant to Section 65915 through participation in cost of infrastructure, write-down of land costs, or subsidizing the cost of construction, the city, county, or city and county shall assure continued availability for low- and moderate-income units for 30 years. When appropriate, the agreement provided for in Section 65915 shall specify the mechanisms and procedures necessary to carry out this section.

65917. In enacting this chapter it is the intent of the Legislature that the density bonus or other incentives offered by the city, county, or city and county pursuant to this chapter shall contribute significantly to the economic feasibility of lower income housing in proposed housing developments. In the absence of an agreement by a developer in accordance with Section 65915, a locality shall not offer a density bonus or any other incentive that would undermine the intent of this chapter.

65917.5 (a) As used in this section, the following terms shall have the following meanings:

(1) “Child care facility” means a facility installed, operated, and maintained under this section for the nonresidential care of children as defined under applicable state licensing requirements for the facility.

(2) “Density bonus” means a floor area ratio bonus over the otherwise maximum allowable density permitted under the applicable zoning ordinance and land use elements of the general plan of a city, including a charter city, city and county, or county of.

(A) A maximum of five square feet of floor area for each one square foot of...
Floor area contained in the child care facility for existing structures.

(b) A maximum of 10 square feet of floor area for each one square foot of floor area contained in the child care facility for new structures. For purposes of calculating the density bonus under this section, both indoor and outdoor square feet and requirements for the child care facility as set forth in applicable state child care licensing requirements shall be included in the floor area of the child care facility.

(3) "Developer" means the owner or other person, including a lessee, having the right under applicable zoning ordinance of a city council, including a charter city council, city and county board of supervisors, or county board of supervisors to make an application for development approvals for the development or redevelopment of a commercial or industrial project.

(4) "Floor area" means as to a commercial or industrial project, the floor area as calculated under the applicable zoning ordinance of a city council, including a charter city council, city and county board of supervisors, or county board of supervisors and as to a child care facility, the total area contained within the exterior walls of the facility and all outdoor areas devoted to the use of the facility in accordance with applicable state child care licensing requirements.

(b) A city council, including a charter city council, city and county board of supervisors, or county board of supervisors may establish a procedure by ordinance to grant a developer of a commercial or industrial project, containing at least 50,000 square feet of floor area, a density bonus when that developer has set aside at least 2,000 square feet of floor area and 3,000 outdoor square feet to be used for a child care facility. The granting of a bonus shall not preclude a city council, including a charter city council, city and county board of supervisors, or county board of supervisors from imposing necessary conditions on the project or on the additional square footage. Projects constructed under this section shall conform to height, setback, lot coverage, architectural review, site plan review, fees, charges, and other health, safety, and zoning requirements generally applicable to construction in the zone in which the property is located. A consortium with more than one developer may be permitted to achieve the threshold amount for the available density bonus with each developer's density bonus equal to the percentage participation of the developer. This facility may be located on the project site or may be located offsite as agreed upon by the developer and local agency. If the child care facility is not located on the site of the project, the local agency shall determine whether the location of the child care facility is appropriate and whether it conforms with the intent of this section. The child care facility shall be of a size to comply with all state licensing requirements in order to accommodate at least 40 children.

(c) The developer may operate the child care facility itself or may contract with a licensed child care provider to operate the facility. In all cases, the developer shall show ongoing coordination with a local child care resource and referral network or local governmental child care coordinator in order to qualify for the density bonus.

(d) If the developer uses space allocated for child care facility purposes, in accordance with subdivision (b), for purposes other than for a child care facility, an assessment based on the square footage of the project may be levied and collected by the city council, including a charter city council, city and county board of supervisors, or county board of supervisors. The assessment shall be consistent with the market value of the space. If the developer fails to have the space allocated for the child care facility within three years from the date upon which the first temporary certificate of occupancy is granted, an assessment based on the square footage of the project may be levied and collected by the city council, including a charter city council, city and county board of supervisors, or county board of supervisors in accordance with procedures to be developed by the legislative body of the city council, including a charter city council, city and county board of supervisors, or county board of supervisors. The assessment shall be consistent with the market value of the space. A penalty levied against a consortium of developers shall be charged to each developer in an amount equal to the developer's percentage square feet participation. Funds collected pursuant to this subdivision shall be deposited by the city council, including a charter city council, city and county board of supervisors, or county board of supervisors into a special account to be used for child care services or child care facilities.

(e) Once the child care facility has been established, prior to the closure, change in use, or reduction in the physical size of, the facility, the city, city council, including a charter city council, city and county board of supervisors, or county board of supervisors shall be required to make a finding that the need for child care is no longer present, or is not present to the same degree as it was at the time the facility was established.

(f) The requirements of Chapter 5 (commencing with Section 66000) and of the amendments made to Sections 53077, 54997, and 54998 by Chapter 1002 of the Statutes of 1987 shall not apply to actions taken in accordance with this section.

(g) This section shall not apply to a voter-approved ordinance adopted by referendum or initiative.

65918. The provisions of this chapter shall apply to charter cities.
