STUDY SESSION MATTERS

City Council Goals and Objectives
Mayor Woodall stated the purpose of the Study Session is to discuss and prioritize both the long and short term goals and objectives of the City.

Interim City Manager Stretch reviewed the process for establishing and prioritizing the Council’s goals and objectives and asked each Councilmember to think about what their long range vision was for the community. He said the idea was to first develop a list of long term goals (5-10 years to accomplish) then a list for more short term goals and projects. Each Council member was provided with eight colored stickers in which they would use to prioritize the final list once identified.

Interim City Manager Stretch stated in his experience as City Manager what worked was to put together a work plan and set a policy as part of the annual budget process and use it as an evaluation tool at the end of the year to see what was achieved.

Each Council member presented their list of long term goals including ideas presented from staff.

The following represents the top five long term goals by priority:
